REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 14. THE REDCLIFF REVIEW, THURSDAY, FEB. 5, 1925. Number 6.

Officials Elected Here By Acclamation

Nominations for Town Councillors and School Trustees passed off quietly last Monday morning. For a time it looked as though there would be difficulty to fill all the vacancies but before the hour was up both slates were completed.

For the Council the following were nominated: Messrs. Broughton, Cox and Campeau. Messrs. Broughton and Cox served on last year's council.

For School Trustees: Messrs. J. Kitchen and E. L. Stone.

These are both new Trustees.

As only the required number were nominated for both Council and the School Board, Returning Officer Henderson declared all elected by acclamation.

There were nominations necessary for Mayor this year as Mayor Bott is serving a two year term.

The School Board now has its full quota of members for the first time in several months.

S. A. Official is Coming to Redcliff

The citizens of Redcliff will have a splendid opportunity next Friday afternoon to meet Commissioner and Mrs. Rich, the Chief Officer of the Salvation Army for Western Canada.

The Commissioner who is an officer of wide experience has recently come to Winnipeg to take charge of the Army's work in the West, and this is his first visit to Redcliff. It is hoped that a splendid crowd will gather for the occasion.

The meeting will take place in the Presbyterian church, and will commence at 4.15 p.m.

It is also brought to the attention of the readers that the Salvation Army hopes to be in operation here, again in the spring.

Complete Church Union Now Close

Amid the clamor of controversy on Church Union, and the hustle of voting on the question of non-concurrence in congregations, it is apt to be forgotten that the realization of Union is so close at hand, and that in about three months time the United Church of Canada will be both a fact and a factor in this Dominion.

Notwithstanding the withdrawal of several hundred congregations from the Presbyterian church, the Union will be Dominion-wide in its scope, and the United church of Canada will consist of some nine-thousand congregations scattered over every part of the country. The combined ministry of the three churches, allowing for non-concurrents will number at least 3,000, in addition to which it will have a staff of about 630 missionaries. The United Church will have a wider missionary program than any one of the separate churches, it will have mission fields in India, Africa, China, Japan, Formosa, Korea, Trinidad, and South America.

Arrangements are already being made for the great consummation of the Union, which, according to the United Church of Canada Act, is to formally take place "In the City of Toronto on the tenth day of June, 1925."

The first General Council of the United Church of Canada will be composed of 150, Presbyterians, 150 Methodists, 40 Congregationalists and 10 members of the General Council of Union Churches. These delegates or commissioners have already been appointed by the chief courts of the uniting churches, and they consist of an equal number of ministers and laymen. One of the first acts of this General Council will be to determine the number and boundaries of the conference to be established, and the number of representatives that shall constitute the next General Council, to be convened within a period of two years.

LOCAL MILITIA TO HOLD SMOKER NEXT WED.

N. C. O.s of the local infantry Company have made arrangements to hold a smoking concert in the G. W. V. A. club rooms next Wednesday evening February 1th, commencing at eight o'clock. A good musical program is being prepared for the occasion and everything points to a splendid evening's entertainment. Admission 75c. This includes refreshments and smokes for the evening. An invitation is extended to all to attend.

This smoker will be a fitting close to the season's training. This same evening, the company will be inspected by the O. C. of the district. The Smoker will follow immediately after the inspection.

Govt. is Handling Feed For Stock

In connection with the distribution, by the government, of hay and straw to needy farmers, Hilda and Schuler will be made the headquater of members of the A P. P. who will receive applications for fodder and make the necessary investigations. Burdett has also been made a temporary post for the distribution of relief fodder. The officers at these points will have all the forms that must be filled out before relief is considered and applicants are asked to be in a position to give a full account of their financial affairs.

In other districts farmers must apply for relief to the nearest A. P. P. office. This arrangement is only concerned with the distribution of hay and straw to those in need of such assistance.

The relief is being given under the Debt Adjustment Act and is not free, a mortgage on the stock being taken in return for the hay and straw supplied, which takes precedence over all other mortgages.

IMMIGRATION SHOWS A DECREASE IN 1924

Canadian immigration figures for 1924, just published, fall short of those for 1923 by 12,800, but taking in the 37,317 repatriations, the gain is 24,447 in a total of 161,767. The 1924 figures from overseas are 57,612 from Britain and Ireland; 50,510 from other countries, and 16,328 from the United States, a total of 124,450. In December, the repatriations from the United States outnumbered immigrants.

Churches

ST. AMBROSE CHURCH

Rev. J. F. Cox, S.T.M., Vicar.

Services in the morning at 11.00 a. m. Rev. Weston of Medicine Hat will conduct the service. There will be no evening service.

12.15 p.m.—Sunday School.

Friday—Choir practice.

GORDON MEMORIAL PRESBYTERIAN CHURCH

Services will be held as usual next Sunday morning and evening at 11.00 a.m. and 7.30 p.m.

Sunday School at 2 p.m.

CHURCH OF THE BRETHREN.

Sunday School, 10.30 p.m.

Preaching, 11.30 a.m., and 7.30 p. m.

Prayer meeting every Wednesday evening at 7.30 p.m.

ST. MARY'S CHURCH

Celebration of Mass 2nd and 4th Sundays of each month at 8.30 a.m., by Rev. Father Fitzpatrick.

Annual Ratepayers' Meeting Last Friday

Despite the stormy weather there was a fairly representative turnout at the annual ratepayers meeting held in Cliff hall last Friday evening.

G. H. Worts was selected as chairman of the meeting. He reminded those present that it was there meeting and invited all to take part in the discussions and ask any questions they wished in connection with the town's business.

Copies of the Aueitors' Reports for the Council and School Board were distributed and after these had been perhsed, Mayor Bott was called upon to address the meeting. The Mayor said that as we had been passing through trying times it was hard to find anything interesting to talk about. In an endeavor to get through the readjustment period which we have heard so much about, governments of all countries had been working overtime trying to bring about more stable conditions in all lines of business activities. Their efforts were now showing signs of being rewarded. The leading countries had now governments in which the public had confidence with the result that capital was loosening up and looking for new avenues for investment and development. Canada is being looked upon favorably as one of these avenues of opportunity and we may reasonably expect that Redcliff with its advantages, will share in the prosperity which is being predicted on all sides. So far as the activities of the Council for the past year were concerned, he said there was little to report, since under present conditions, their actions were largely controled by the Public Utilities Commission.

Several questions were asked in connection with the town's finances as sea forth in the Auditors' Report. There were satisfactorily answered by the Sercetary-Treasurer.

R. S. Hodge asked if those who paid the Service Tax were eligible to vote on municipal affairs. The Mayor explained that according to the Town Act they were not. After some discussion in which it was pointed out that this was taxation without representation, the meeting passed a resolution requesting the Council to consider the matter of having the Town Act changed so as to give such tax payers a vote.

A. N. Collard, chairman of the School Board reported on conditions at the school. He said that the attendance at the school at present was larger than the population of the population of the town would indicate. There are twenty more pupils attending now than at this time last year. By the cutting down of the staff, made necessary because of conditions, all the roofs were overcrowded, averaging forty-seven pupils to the room, with two and three grades in each room. As this was not hardly fair to either the teachers or the pupils the Board had been trying to make it possible to secure an additional teacher, but so far they had not been able to get the approval of the representatives of the Bondholders to do this. At present the teachers are all overtaxed and already two had resigned because they could not stnd the strain. Despite this, however, everything was going harmoniously at the school and the pupils were maging as good progress as could be expected under the circumstances. He assured the ratepayers that the business of the school was being carried on on a rock bottom level. No money was being expended except on the approval of the Commission. The estimates were slightly exceeded last year. This was occassioned by an increase in the gas bill because of the extremely cold weather, sickness among the teachers and increase in the insurance carried on the school property. The latter was done at the request of the bondholders.

The chairman called on Mr. Muncaster, principal of the school. Mr. Muncaster said that present indications were that in the very near future some attention would have to be given to the High School if the work there was to be carried on successfully The room for the high school grades was no well filled and a large number would likely be promoted from the public school this midsummer. He assured the ratepayers that the teaching staff would like to see the parents take a keen interest in the school. Such an interest would be beneficial to all concerned.

The meeting closed with the singing of the National Anthem.

Grow More Corn Says Prof. Murray

The past season was the most unfavorable corn year in Southern Alberta for over a decade. It was cool at both ends and hot and dry in the middle. But it was not bad enough to blight the hopes of those who have seen in corn one of the most promising fodder and grain crops for this part of the cuntry. On the contrary it demonstrated that by planting suitable varieties on well prepared land and keeping them well cultivated it is possible to grow good crops of corn under conditions that prve fatal to wheat and oats.

This was demonstrated on many farms over a wide range of territory even where the soil conditions for the corn were far from ideal. When corn and oats or corn and wheat were planted under similar conditions and the corn given reasonably good cultivation the corn in many instances hung on during the hot dry weather of July that proved fatal to the small grains. When the late rains came the corn revived and produced a fair crop while the Russian thistles smothered the oats and wheat. In a few instances where corn was planted on good summerfallow a crop was harvested that would be a credit any year.

Not all, by any means of the corn planted produced a crop. Some of it never even started and many fields were abandoned to Russian thistle when general crop condtions looked so blue, but when it was well looked after no other crop did so well. It promises to go a long way toward solving the food problem when it is given a fair try out on the average farm.

Home grown seed is scarier than usual this year but seed of Gehu, Dakota White Flint and northern grown North-Western Dent can be obtained from any of the seed houses. The cost of seed per acre is less than that of most any other farm crop as one bushel will plant from five to eight acres. The supply of good northern seed—the only kind that should be planted—is less plentiful than usual and growers would be well advised to place their order well in advance of seeding time.

A bulletin on "Corn Growing in Southern Alberta" which was issued last year deals comprehensively with the subject and can be secured by application to the undersigned or to the Department of Agriculture, Edmonton.

JAMES MURRAY,
District Agriculturist, Medicine Hat.

SASK. GRAIN GROWERS WANT LIVESTOCK POOL

The principle of a provincial livestock pool was endorsed Friday afternoon by the Saskatchewan Grain Growers, and the central board was instructed to appoint a committee on the subject, and if a workable plan could be evolved to bring it into operation, securing where possible the cooperation of other interested groups.

Millions of Acres Close To Railways

"It is true that Canada's railway mileage is vastly in excess of the traffic available to support it and our rail way services are expensive and beyond the needs of the country, and it may be added that our population is inadequate to bear easily the national burden of the country," said E. W. Beatty, president of the C. P. R., at a banquet of the Pulp and Paper association in Montreal.

There are approximately 25,000,000 acres of vacant land in the three prairie provinces within 15 miles of existing railways. If these were divided into 320-acre farms it would mean 78,125 new farms suitable for immediate cultivation. If on each half section there were colonits the total would be 312,500. Government statistics estimate the value of each colonist in the purchase of goods at $1,362,25 net per annum, so the value of this settlement to the country would be $122,105,000 per annum.

There is nothing that will hold our people and invite others so much as national prosperity, and here I would touch upon the burden of taxation, which is a disturbing circumstances to all those in business and which is not becoming appreciably lighter. In 1922; with a population of 8,700,000, Canadians paid in taxes approximately $561,000,000. This total was 19 per cent of the year's total net production of all Canadian industries, including fishing and agriculture. It was almost half the net agricultural production and exceeded the combined gross production of Canadian forests and mines. It was 50 per cent of the net manufacturing production of that year.

WOULD REVISE TARIFF

Immediate revision of the Canadian tariff on a definitely and consistently protective basis, is put forth as the best solution of Canada's economic problems in a resolution of which notice has been given by the leader of the opposition in the federal House of Commons, Arthur Meighen.

"Such revision should apply to natural products, such as farm produce, fish and coal," with no less thoroughness than to manufactured goods, adds the manifesto, which is to be placed on the order paper in the form of a resolution for discussion in parliament in this session.

CONFERENCE OF WESTERNERS

A conference of the premiers of British Columbia, Alberta and Saskatchewan, mayors of the cities, reeves of the important municipalities and news papermen of the three provinces will be held in Alberta, probably at Edmonton, in June, it has been announced. The conference has been arranged to promote closer co-operation betwen the prairie provinces and the city of Vancouver.

SCHOOL NEWS

The High School students are busy preparing for a Valentine party which will be held at the school on Friday February 13th.

Miss Broadfoot, in charge of grades V and VI, has applied leave of absence from school for the rest of the current term, and is leaving town shortly. Her position is being taken by Mrs. Murphy who formerly taught in the school.

Mrs. Stone, who was called to Maple Creek owing to the illnes of Mother, returned to the school Monday.

The following pupils of grade I room (Miss Hicks) have shown good proficiency in number recently:

Teddy Wallof, Dorothy Bishop, Elmer Congram, Clarence Wilkie, Irwin Miller, Bob Land, Bud Moses, Sidney Pearson, Emma Podesta, Joe Rynen, Curtis Buchholz, Jack McIntyre, Leona Underdahl, Maxie Browniee, Locklin Wells.

The following marks show the result of test in Arithmetic in Grades VI, VII, and VIII:

Grade VI.

Herbert Lust, 99; Frances Buchholz, 93; Mary Maskell, 92; Billy Sellhorn, 91; George Evans, 90; Evelyn, Cook, 81; Jennie Pearson, 80; Thora Ziegler, 80; Orpha Bezler, 75; Chas. McAfee, 66; Norman Dickson, 56; Evelyn Hicks, 49; Dorothy Ferguson, 47; Erwin Schmidt, 44; Alex Patterson, 18; Willie McCleary, absent.

Grade VII.

Viva Cox, 98; Etta McLean, 82; Maisie Hill, 76; Greta McKay, 68; Howard Keats, 68; Allie Lokis, 63; Beatrice Tester, 62; Nancy Martin, 55 Ena Snedon, 31.

Grade VIII.

Alberta Rynen, 100; Winnifred Belisle, 95; Kenneth Ross, 95; Eunice Minnick, 85; Nona Rose, 80; Gladys Hurlburt, 75; Elsie Frey, 75; Arthur Johnson, 67; Ada Zeigler, 49; Ruth McAfee, 46; Nellie Miller, 45; Henry Jacobson, 33; Marie Quinn, 30; Lizzie Patterson, 28; Ivy Podesta, 23; Wm. Dickson, 20; Tom Rutherford, 19; Billy Balmer, 14; Margaret Quinn, 10.

The following marks show the results of test in English History in Grades VI, VII and VIII:

Grade VI.

Frances Buchholz, 96; Mary Maskell, 84; Evelyn Cook, 80; Jennie Pearson, 80; Bill ySellhorn, 76; Geo. Evans, 76; Thora Ziegler, 72; Evelyn Hicks, 66; Herbert Lust, 62; Dorothy Ferguson, 62; Chas. McAfee, 56; Orpha Bezler, 56; Erwin Schmidt, 44; Willie McCleary, 32; Alex Patterson, 30; Norman Dickson, 10.

Grade VII.

Maisie Hill, 82; Beatrice Tester, 76; Greta McKay, 74; Howard Keats, 60; Etta McLean, 56; Allie Lokis, 50; Nancy Martin, 41; Ena Snddon, 10.

Grade VIII.

Winnifred Belisle, 90; Alberta Rynen, 88; Eunice Minnck, 80; Kenneth Ross, 80; Nellie Miller, 78; Gladys Hurlburt, 76; Marie Quinn, 72; Nona Rose, 72; Elsie Frey, 72; Viva Cox, 66; Margaret Quinn, 66; Tom Rutherford, 65; Ruth McAfee, 62; Ivy Podesta, 62; Arthur Johnson, 60; Billy Balmer, 56; Ada Ziegler, 50; Henry Jacobson, 50; Lizzie Patterson, 48; William Dickson, 40.

"Instead of bringing over 1,000 British families this year under the Empire Settlement act, we intend to bring over 1,200 families with an average of five children to each family," announced John Barnett, chairman of the Soldiers' Settlement Board, during a recent visit to Winnipeg. Major Barnett who has just made a tour of the west in connection with the settlement of these familiees, believes that th scheme will be successful. The families will be placed on the better vacant farms of the board and will not be placed in areas mainly inhabited by non-English speaking people. Also, the board will not conclude an agreement with any head of a family until he has remained on the land for six months; which he does free of all rent.

Gordon Memorial Calls Rev. Matheson

At a congregational meeting held in Gordon Memorial church last Monday evening, members and adherents of the congregation unanimously decided to moderate in a call to Rev. R. Matheson, of Yellow Grass, to fill the vacancy caused by the removal of the former pastor, Rev. T. S. Paton.

Rev. Thos. Wilson, of Medicine Hat, interim Moreator during the vacancy, presided at the meeting. Mr. Wilson outlined the form of procedure, after which a vote by ballot was taken, with the above result.

There was an exceptionally large turnout of both members and adherents at the meeting and all signed the necessary document to be presented to Mr. Matheson.

It is not definitely known when Mr. Matheson will come to Redcliff but we are assured the move will be made as quickly as possible.

Redcliff S.O.E. Bros. Meet With Hat Lodge

The hall of Lodge Prairie Rose No. 4 of the Sons of ngland Benefit Society was a scene of great activity Wednesday evening, the 28th of Jan., when the Past Presidents of that Society had their night. This was the first time in the history of the local lodge that a Past Presidents' night had been held and it was very gratifying to see eight local past presidents present, also 8 from lodge Rosemere, Redcliff. The whole of the evening was given over by the lodge to these past officers, who filled all positions and carried out the ceremonial work also exemplifying the Red Rose degree. This work was carried out very successfully and will prove a source of inspiration to the new officers. The positions were filled as follows: Past Pres., P.D.D.G.P. Bro. C. W. Twaites; President, P.D.D.G.P. Bro. Jas. Bruce; Vice Pres., P.D.D.G.P. Bro. H. Bristow; Chaplain, P.D.D.G.P. Bro. J. Pickard; Secretary, P.D.D.G.P. Bro. B. J. Bott (Rosemere); 1st Guide P.P. Bro. John Bruce; Inside Guard, P.P. Bro. A. Hooper; Outside Guard P.D.D.G.P. Bro. W. Cockerill. Past Presidents Bros. Kitchen and Congram of lodge Rosemere, Redcliff, also took part in the ceremonial work.

For the initiation ceremony the positions were reversed a littel as follows: Past Pres., P.D.D.G.P. Bro. W. Cockerill; President, P.D.D.G.P. Bro. H. Bristow; Vice Pres., P.P. Bro. John Bruce; Chaplin, P.D.D.G.P. Bro. J. W. Pickard; Secretary, P.D.D.G.P. Bro. Jas. Bruce; 1st Guide P.D.D.G.P. Bro. B. J. Bott; Inside Guard, P.P. Bro. A. Hooper; Outside Guard, P.D.D.G.P. Bro. C. W. Twaites.

After lodge a sumptous lunch was served the catering being done by the past presidents, and from the dishes served went to show that they were fully aware of the needs of the inner man. A social followed with P.D.D. G.P. Bro. B. J. Bott of Lodge Rosemere, Redcliff, as chairman and this position was filled to perfection. His remarks were given in well chosen words and were followed with great interest, after which almost every member was called upon to give a turn. A lengthy programme was gone through before breaking up about midnight and each and everyone voted that the past presidents knew how to stage a good time.

PRIEST MAY NOT GET INSURANCE MONEY

Father Delorme, thrice tried for the murder of his half brother and finally acquitted, may not now get the insurance money on his half brother's life. Insurance companies claim that if the half brother was not murdered he committed suicide and that in consequence the policy insuring his life for $25,000 in favor of the priest is void.

The West's Rapid Growth

In the onward march of progress all young countries have problems to solve and difficulties to overcome, and Canada is no exception. In fact, because of its geographical formation and its northerly latitude some of its difficulties and problems are intensified, and if its citizens dwell too greatly on these they are apt to become discouraged and pessimistic as to the future. And in the case of Canada this is especially true because of the contrast afforded by the great self-contained country to the south. Careful study of this Dominion's position, however, leaves room for nothing but encouragement and a sound optimism.

Young countries naturally lack accumulated wealth to enable them to successfully and quickly solve problems in the efficient manner possible to old established and wealthy nations. But on the other hand a young country is not handicapped by long established traditions, customs and vested rights and interests. Rather it enjoys the immense advantage of being able to introduce new policies, inaugurate reforms, and try out plans altogether impossible in older lands.

In this age, and in this country, people are inclined to be somewhat impatient in the achieving of results, and they jump to the conclusion that Canada's progress is too slow. This feeling is engendered, as already noted, by the contrast afforded by the United States. But if Canadians would pause and take thought for a moment of the position of their country with most of the nations of the world, they would realize that Canada's growth and development during the past twenty-five years, instead of being slow, has been amazingly rapid. Furthermore, a review of world conditions will convince them that this Dominion is just beginning to strike its gait and is on the eve of tremendous growth.

Canadians who may be inclined to pessimistic views will be well advised to consider a few facts and conditions having a direct bearing on their country's future. Space will only admit of the presentation of a few salient ones.

During the past one hundred years the United States has shown phenomenal growth. With its doors wide open to the whole world, people poured in by the millions, its vacant lands were occupied, its natural resources developed, and its industrial and financial fabric built up. Now, with a population of over one hundred millions, with its lands occupied, its urban population of food consumers far out-numbering its rural population of food producers, it is closing its doors to newcomers because of a realization of the fact that the day is fast approaching when it will no longer be a self-contained nation, but will be obliged to become a food importing country in order to sustain its present population and provide for its natural increase. Within recent weeks no less an authority than President Coolidge has sounded a note of warning and urged preparation for that time within the life of men now living when, instead of exporting foodstuffs, the United States will be forced to import them. It has even been predicted that the United States will be forced to adopt the policy of insisting upon receiving foodstuffs in exchange for any they may export.

The population of the world is increasing more rapidly than is the volume of food production. What does this mean to Canada, and especially to Western Canada, which is essentially a food producing country? The question supplies its own answer. Let the possible pessimist note the following facts in Canada's recent development, and then throw away his blue glasses.

The cultivable area of the three prairie provinces is estimated at 167,000,000 acres, of which slightly less than 38,000,000 were under cultivation in 1923, or only a little more than one-fifth. The cropped area increased by more than one-quarter in the last four years.

The butter production of Western Canada increased fifty per cent. within the past three years, which increase alone was more than doubt the total output of 1910. In 1923 no less than 77,955,000 pounds were produced.

Livestock, in spite of handicaps, increased over ten per cent. from 1921 to 1923.

Eggs increased from 7,235,299 dozen in 1900 to 78,813,982 dozen in 1923. They almost doubled in the last three years.

The production of honey in the West amounted to only 20,182 pounds in 1900, but in 1923 totalled 3,163,312 pounds.

Coal mined in Western Canada totalled 7,288,430 tons in 1923, more than double that of 1910, and 43 per cent. of the total production of Canada.

Western Canada's waterpower, as yet barely touched, amounts to over four million available horsepower the year round, and about double that amount for six months in the year.

The timber resources of the West are estimated by the Dominion Government Bureau of Statistics at 27,290,000,000 feet, board measure.

The railway mileage of these Western 0rovinces has more than quadrupled since 1900 and more than doubled since 1910.

The population of the prairie provinces at the census of 1921 was four times what it was at the census of 1901 and nine times what it was in 1891. With the shutting out of immigration into the United States, Canada is becoming the mecca for the shifting population of the old world.

The above figures do not indicate a disappointingly slow growth. They provide no reason for pessimism. On the contrary, they are the foundation for and basis of even more rapid growth in view of an increasing world demand for food at improved prices which Western Canada, better than any other country, can supply.

Larger Market Assured

It is very probable that as a result of the adoption of a resolution by the British Empire Producers' Organization, Canadian wheat will find a much greater market in Great Britain. The resolution urged that the wheat, which must still be imported after the home supply has been absorbed, should be purchased from the wheat-growing centres of the Empire.

Grain From North

Figures compiled by the Alberta and Great Waterways Railway show that grain has been shipped over this route during the months of August, September, October and November, as follows: 90,433 bushels of wheat, 96,217 bushels of oats, and 64,292 bushels of barley. The total shipment of all grains for the season is 251,042 bushels.

Children Cry for

Fletcher's
CASTORIA

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of Chas H Fletcher.
Absolutely Harmless - No Opiates. Physicians everywhere recommend it.

Cancelled Physician's License

English Medical Council Does Not Allow Any Advertising

Dr. Haydn Brown, F.R.S., an eminent English physician, has lost his license to practise; it was cancelled by order of the General Medical Council because the doctor wrote a signed article for a newspaper, thereby "advertising" himself. What he should do now is to devote himself to the writing of health articles for newspapers. He would thus be doing more good and probably would make a larger income than by practising.—Hamilton Herald.

WORK WORN PEOPLE

Find Renewed Health By Improving Their Blood

If you feel run-down, it means that your blood is thin and watery, that your vitality is low. Your feet are easily chilled. You do not sleep well and you are tired when you rise in the morning. You find no pleasure in your meals and are listless and dispirited at your work. You have no energy to enjoy yourself.

Thousands of men are run-down by anxieties of work. Thousands of women are broken down by their household toil, with tired limbs and aching backs; thousand sof girls are pale, listless and without attraction. It all means the same thing—thin and watery blood, vitality run down, anaemia, poor appetite, palpitating heart, short breath.

Do not submit to this. Get new blood and with it new vitality. There is no difficulty in doing this. Dr. Williams' Pink Pills build up and enrich the blood, which brings with it new health and vitality. The man, woman or girl who takes Dr. Williams' Pink Pills is never run-down. Their friends notice how energetic they are, what a fine appetite they have, and how much they enjoy life.

You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Secret of Influence

An American exchange asks how it comes that Britain seems to have such influence in the League of Nations. Perhaps it is because Britain pays her debts.—Ottawa Journal.

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has given it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

Edmonton Growing

Two hundred dwellings were erected in Edmonton last year at a total cost of $600,000. Total building permits up to the end of November aggregated $2,281,100.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them and welcome them as speedy easers of pain, because they promptly remove the worms that cause the pain, and thus the suffering of the child is relieved. With so sterling a remedy at hand no child should suffer an hour from worms.

Popularity Of Radio

One Hundred Thousand Receiving Sets In the Homes of Canada

It has been estimated that there are 100,000 radio receiving sets in the homes of Canadians. At March 31st, 1924, there were forty-six broadcasting stations in the Dominion, as compared with six hundred in the United States. The number of receiving licenses sold during the year was 31,609, for which the Government charges $1.00 each. Next year it is estimated the revenue from this source will be $70,000.

Supply Follows Demand

Create Need for Goods and Unemployment Will Cease

To relieve unemployment the wheels of industry and trade must be speeded. The secret of unemployment is that there is no demand in the world at the moment for the goods that the unemployed can supply. Supply follows demand, not demand supply, as the slump of 1921 proved.—Dublin Freeman's Journal.

Has Great Library

The world's largest library of large books is in the possession of Dr. Franz Heightner, a physician in Switzerland. In his library, which contains hundreds of volumes, there is no book that weighs less than three pounds. The library is heavily insured.

Canadian Warship With British Fleet

H.M.C.S. Patriot is to join the North America and West Indies squadron of the British navy for three months. She will carry out all drills and exercises performed by the squadron and will take part in the cruise of the West Indies.

For Every Ill—Minard's Liniment

League Would Curb Traffic In Munitions

Taking Steps to Limit Manufacture of Materials of War

War or no war, the munitions business in Europe is good. During the years which followed the close of the late international cannon makers picnic until 1923, the exports of material of war from one European country into another, not including equipment has overstepped the alarming total of $250,000,000. And the world has been almost pacific during this time.

The traffic commission of the League of Nations, which has rummaged out these figures, has set about to cut the dividends of the martial manufacturers by introducing a convention, which has been distributed to all nations, for the establishment of an international control of arms.

The convention itself is a technical document of great length which experts claim so effectively limits the manufacturers of war as to put a stop to petty warfare among the disturbing elements of the universe, and makes it hard for the greater nations to keep a war chest in the closet along with the skeleton.

Harnessing Waves Is Newest Achievement

Swedish Inventor's Machine to Get Energy Out of White-caps

Harnessing the white-caps is the newest scientific achievement.

According to the Stockholm "Dagens Nyheter," a Swedish inventor, Lieut. Engineer Lundberg, has invented an apparatus which will revolutionize the exploitation of energy from ocean waves and currents.

In this way one of the greatest of natural sources of latent energy may finally be harnessed.

Engineer Lundberg's apparatus is a huge instrument, measuring two hundred yards in length, and a hundred yards in width. It weighs 20,000 tons and will cost about ten million Swedish kroners (2,500,000) to install.

According to the announcement it will be possible to use 60 per cent. of the eenrgy of a wave ten feet high. From such a wave, acting under certain conditions, it will be possible by means of the Lundberg apparatus to obtain 15,200 horsepower.

Record Output Of Mines

British Columbia Breaks All Records Far Production in 1924

According to a statement of Hon. William Sloane, Minister of Mines for British Columbia, the mines of the province this year have broken all records for production in the history of the province.

With an output valued at more than $45,000,000, they show an increase of nearly 10 per cent. over the 1923 figures.

The monetary value of the output of the mines of British Columbia, for the year 1924, is officially estimated to be $45,116,285. This is an increase over the 1923 figures of $3,811,965.

The increase in the production of the metalliferous mines of the province is one of the most striking features of mining activity during the past year. The metal mines have given a production valued at $32,310,600, as compared with $26,767,062 in the previous year.

Settlers For Saskatchewan

Five Hundred Families From Ukraine Are Expected Soon

Arrangements for the settlement on lands in Central and Northern Saskatchewan of five hundred families from the Eastern Ukraine, early in the coming spring were completed at a conference of immigration officials, officials of the St. Raphael Society and the Board of Trade, held in Saskatoon. The prospective immigrants will not be asissted by settlers any further than the assistance tendered them by the St. Raphael Society in locating suitable farm lands on arrival in this district. All have been carefully selected by immigration officials in the Ukraine and all will have sufficient funds to permit of them securing a reasonable start on arrival.

Visit Would Be Popular

Princess Mary Is Expected To Visit Canada Next Year

Princess Mary probably will visit Canada during the coming year, it is reported in court circles in London. The only daughter of the King and Queen will be accompanied by her husband, Viscount Lascelles, and her children. The visit will be of an informal nature.

Princess Mary is not as wide a traveller as her brother, the Prince of Wales, her little journeys being confined to short trips to France and Italy, where she spent her honeymoon.

No date for the visit has been mentioned.

Eight hundred colonists from Scotland were settled by Lork Selkirk in Prince Edward Island in the summer of 1803.

Take Hopeful View

Traveller Sees Trade Revival In Canada By Next Spring

Lauding the trade-within-the-Empire policy, adopted at the Imperial Economic Conference, J. Harry Dodgson, retiring President of the Commercial Travellers' Association, at the annual meeting of the organization at Toronto, predicted a trade revival in Canada by next spring.

This optimistic viewpoint was also held by F. J. Zammers, the newly-elected President for 1925, who, while not anticipating any marked change during the winter months, felt confident that before the next harvest Canada would be enjoying the commencement of a period of permanent prosperity.

Despite adverse trade conditions in the past year, the organization reported the best year in its history.

Where Canada Is Leading

Canada Rapidly Assuming the Leadership in Production of Minerals

The Natural Resources Intelligence Service of the Department of the Interior says that if Canadians would give more serious thought to the great mineral resources of their country they would more fully appreciate them. They take too much for granted, and appear to think they are not of any individual interest except to a few promoters or others directly interested. The number of minerals, both precious and economic, in which Canada is at present, or is rapidly assuming the leadership in production would surprise many of our people if they would but give a little thought to the subject.

Impressed With Canada

Prominent British Business Man Is Pleased With Prospects Here

So impressed was he with the Canadian exhibit at Wembley, that E. W. Petter, M.I.M.E., President of the British Engineers' Association, Chairman of Petter's, Limited, and Managing Director of Vickers-Petters, Limited, forthwith set sail for the Dominion to make a first-hand examination of its resources and, after six weeks' investigation, he made the statement before a group of engineers and business men that the potentialities for development in Canada, particularly along engineering lines, were almost illimitable. He will present his findings to his business associates in Great Britain on his return.

Ensuring Independence

Speaking broadly, no man who has had fair health and an elementary education need be in poverty at sixty. During his years of activity he has had ample opportunity to make provision for his old age. A sound plan, accompanied by the willingness to sacrifice, are the chief requisites. In a majority of instances, dependence at sixty-five means there have been improvidence, idleness or vice.—Ottawa Journal.

Market For Clover Seed

An extensive market for Canadian clover seed is being built up in Denmark, according to a report of the Department of Trade and Commerce. Red clover is the favorite seed of the importers, imports during the past few years having averaged no less than 1,620 metric tons.

GIN PILLS
FOR THE
KIDNEYS

Deranged Kidneys may in time lead to serious illness. If you detect any symptom take Gin Pills. They will relieve you.

Expert Predicts Great Future For Airplanes

Believes Any Part of Empire Can Be Reached in 24 Hours

A British Empire wherein every far-flung outpost will be able to be reached in 24 hours from London by airplane, is the prophecy for twenty years hence given by Commander C. D. Burney, Member of Parliament and one of the leading British aviation experts.

"The new airship which I am building, I believe, will bring India within four days of London," said Commander Burney. "This will be the start, and no one who has any imagination can believe the greatest developments will not follow. The line of technical development that is indicated, is a device which will use oxygen in its fuel cycle, thereby allowing the machine, totally enclosed, to fly at a height of 100,000 feet. If this is done, we will be within sight of our goal—namely, reaching any part of the British Empire within 24 hours."

For Both House and Stable.—There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Eclectric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower order of animals.

With A Difference

A worthy missionary in India had the hymn, "Rock of Ages," translated into Hindustani. On translation into English by a student, the first two lines bore this inspiring and illuminating aspect:

"Very old stone, built for my benefit,
Let me absent myself under your fragments."—New York Times.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

Effects Of Travel

Fish from the Atlantic coast is sold in Ottawa for five times the sum received by the fishermen, which may be an instance of the broadening effect of travel.—Montreal Gazette.

Minard's Liniment for the Grippe

Raise Duty On Autos

Automobiles suffer the brunt of increases in duties provided by the new tariff bill which affects practically every commodity imported into France, excepting foodstuffs.

Cattle Shipments

The number of cattle shipped overseas from Montreal during the season just closed totalled 44,155 head, an increase of more than 13,000 over last year's figures and more than double those of 1922.

Genuine BAYER
ASPIRIN

Insist on BAYER TABLETS OF ASPIRIN

Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer product proved safe by millions and prescribed by physicians 24 years for

Colds Headache Neuralgia Lumbago
Pain Toothache Neuritis Rheumatism

Safe → Accept only "Bayer" package which contains proven directions.
Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

New Canadians Can Do Much For Western Canada In The Matter Of Securing New Settlers

One of Canada's greatest needs from the country's standpoint, is immigration. We need more people to take up the vast areas of cultivable land that abound in Western Canada particularly. The prairie provinces are being developed largely by people from overseas or from the United States. These new Canadians have a stake in Canada that warrants them in taking a personal interest in its progress—they should want to see their adopted country go ahead. These people can do much to help in the matter of new settlers. In their old homeland they had their circles of friends and acquaintances. Many of these would no doubt welcome information about Canada, they would be glad of a letter from one in whom they have confidence giving an outline of the experience of their old neighbor in this new land. This intimate contact might be the deciding factor in the case of many who are contemplating making Canada their new home. Canada can provide homes and farms for millions. The world market is ready for Canada's produce, and will be dependent more and more upon this country for future supplies of foodstuffs.

If those new Canadians who are already making good in the prairie provinces would take a personal interest in the great need of Canada for larger numbers of settlers, they would be serving not only the interests of their country, but would be doing much to help those in the homeland to come to a decision to make Canada their new home, where they can raise their families in comfort and with opportunities for their future.

The Natural Resources Intelligence Service of the Department of the Interior will gladly send information concerning Canada and its opportunities to anyone in any part of the world whose address is supplied by settlers in Western anada.

When Wood Gets Scarce

Time Coming When Wood Will Be Much Scarcer Than It Is Now

Canada got so much out of the forests that one can hardly realize that the day is coming when wood will be much scarcer and consequently higher priced than it is today, says the Natural Resources Intelligence Service of the Department of the Interior. What will take its place is a question that many industries are carefully considering. Metals have been substituted in many cases, but the demand for wood continues to grow at an alarming rate. We, however, are still burning our forests at a greater rate than we are using them for commercial purposes.

Northern Alberta Fisheries

Big Catch In Northern Lake Is Anticipated This Year

Preparations are now under way for the winter fishing operations on the big lakes of Northern Alberta. A total of 550 commercial fishing permits have been issued by the Dominion Fisheries Office in Edmonton, compared with 460 last year. It is expected that 70 more will be issued. Last year the catch of the Northern Lakes amounted to some 1,500,000 lbs. of dressed whitefish, and it is expected that the catch this year will equal, if not exceed, that figure.

Increase In Butter Output

Saskatchewan Shows Healthy Increase In This Industry

Butter production in Saskatchewan during the month of October topped the 1,000,000 pound mark, the first time that it has occurred in this month in the history of the province. Total production in the month under review was 1,129,010 lbs., a gain of 89 per cent. over the same month a year ago, while the cumulative production for the first nine months of the current year totalled 12,189,360 lbs., an increase of 25.9 per cent. over the corresponding period of 1923.

A Successful Farmer

After farming in Alberta for five years, Nick Chyelte, a Norse-American from Montana, steps into the international limelight by winning the championship for alfalfa at the great Chicago show. Chyelte farms on the Bow Slope in the C.P.R.'s irrigation block in the Brooks district and has made a special study of alfalfa, which thrives in that area.

Killed By Falling Tree

John Sullivan, bush man, was instantly killed at a lumber camp on Nipigon Straits by a falling tree. News was brought to Port Arthur by a "runner" who took three days to walk the distance.

W. N. U. 1558

Over $10,000 From One Crop

Southern Alberta Irrigated Lands Bring Big Returns

A special correspondent of the Lethbridge Herald, writing recently from Cardston, Southern Alberta, said: "Parker Ellis, of the United Irrigation District, at Cardston, recently deposited the deeds to his 160 acres of land in the U.I.D. in his safety-deposit box at the bank, and walked out with $1,600 to his credit after paying in full for his land from the proceeds of one crop off the land which he purchased in 1922, prepared for crop in 1923 and harvested in the fall of 1924.

"And this is how he did it: In 1922 he came here from Sweet Grass, bought a farm in the U.I.D. for $34 per acre. He prepared it for crop in 1923, breaking 100 acres and summerfallowing 53 acres. In 1924 he harvested something better than 6,800 bushels of wheat, selling it at $1.52 net at Cardston. This gave him an average of 46 bushels to the acre, or $69 in hard cash, making a total return of $10,336. With this he paid for his land, paid the taxes for three years, paid his water rates, and came out with $1,600 cash surplus."

This is evidence of what can be done, for it has been done, and is also one reason why the U.I.D. land has been in such demand this year.

Output Of Ontario Mines

Ontario Expected to Produce More Gold Than U.S. By 1928

Speaking before the Empire Club at Toronto, Hon. Charles McCrea, minister of mines for Ontario, stated that the estimated output of the mines of the province this year will approximate between $74,000,000 and $75,000,000. He laid particular stress on the increase in gold production and stated that by 1928 Ontario was expected to overtop the total production of the United States.

The output of gold reached a new high mark for Northern Ontario during November. Combined production from Porcupine and Kirkland Lake during the month was around $2,300,000, or at the rate of between $27,000,000 and $28,000,000 a year.

Clover Seed Production

Experiments Show Returns From Second Cutting Were Small

One of the experiments carried out in the past few years at Kapuskasing, Ont., has been a comparison of yields and quality of red clover seed from first and second cuttings. It has been found that the returns from the second cutting were almost nil and apparently could not be depended upon in average years. The results would also indicate that broadcasting the seed is just as efficient and possibly gives a little larger yield than seeding in rows twelve inches apart, and this is even more in evidence when compared with the results from the plots which were seeded in rows twenty-four inches apart.

Market For Asbestos Cement

Demand From India Likely to Boost Canada's Industry

Simply because monkeys play havoc with tiled roofs in India, Canada's asbestos industry may benefit. A report from Calcutta received by the Department of Trade and Commerce speaks of the growing market for asbestos cement roofing. The tea industry is prosperous and the Indian tile and corrugated iron roofing used on tea estates is giving place to asbestos. The iron roofing is hot; Indian tiles leak and troops of monkeys delight in flinging them to the ground. Hence asbestos.

A Million A Minute

An order amounting to $30,000,000, at an estimated profit of $3,000,000, was taken over the telephone recently by Samuel Vauclain, president of the Baldwin Locomotive Works. The order was for 375 Decapods for the Pennsylvania railroad, and it required just three minutes to conduct the entire transaction.—Telephone Bulletin.

Negotiating For A Loan

The Polish ministry of finance has confirmed reports that Poland is negotiating for a loan in the United States. It is expected to be in the neighborhood of $30,000,00 0or $40,000,000.

Ricin, the chemical principle of castor beans, threatens to break all records for poison strength, according to scientists.

Spectroscopic observations of Mars during its recent approach to the earth disclosed the fact that its two moons are composed of iron.

Germany Corners Coffee

Has Enormous Amount Stored and Price Is Soaring

Coffee, always a luxury, has become a super-luxury. Prices soar and tend to go higher. The civil war in Brazil last summer had something to do with it; but the main factor has been the heavy importation of coffee during the past year by Germany. Germany is now not only the main storehouse of the world's coffee supply, but a heavy exporter at the recent increased prices. German banks are in the way of making millions in profit, represented by the difference between prices at which they bought coffee some months ago and the prices at which they are now selling it.

The means by which Germany has for the moment become the coffee market of the world are connected with her recent financial practice. To evade payments under the treaty of Versailles millions of German money was deposited in foreign banks, among others in the banks of Brazil, also in banks of the United States. When time for settlement came early last year, many payments were made in kind; thus Germany became a storehouse for American dried fruits and canned goods and for Brazilian coffee. These commodities, always valuable, were desired by the German financiers in preference to cash, because cash is susceptible to requisition on Government account or for Governmental uses. Thus now, when coffee goes soaring, Germany holds an enormous storage upon which she is making a prodigious profit.—San Francisco Bulletin.

Lord Selkirk Highway

Work To Be Proceeded With Immediately Is Report

Gravelling of Lord Selkirk highway, the principal artery of communication between Manitoba and the United States, will be proceeded with immediately, according to an announcement made by the deputy minister of highways in Manitoba. The total estimated cost for the completion of the highway from St. Norbert, Man., to the international boundary is $320,000. It will form a connecting link with four chief highways south of the border.

Canadian Flour Exports

Slight Increase Is Shown In Quantity Exported In Recent Months

Wheat flour exports from Canada during the four months ending November, 1924, show some improvement over the corresponding period of 1923, according to a bulletin issued by the Bureau of Statistics. According to the report wheat flour shipped in the four-month period just passed totalled slightly over 23,000,000 barrels, as compared with 19,260,618 barrels last year.

Donation Is Refused

A New York draft for $1,000, received by the Prisoners' Relief Society, from a man who described himself as a "bootlegger by profession," was refused by the society at Washington. The would-be donor wrote: "I may need your assistance some time and I am going to pay in advance."

In one year the Royal Mint of England produced 287,500,151 silver and bronze coins.

Strong Hand In Egypt

NEVILLE M. HENDERSON

the new British minister plenipotentiary to Egypt. He was formerly charge d'affaires at the embassy in Turkey and is an authority upon eastern problems. His appointment was designed to strengthen the hand of Viscount Allenby by giving the high commissioner in Egypt an experienced diplomatic adviser.

May Establish New Trans-Atlantic Port

Bay on Ireland's West Coast Noted For Scenery

A project is afoot to make Blacksod Bay on the west coast of Ireland a big trans-Atlantic port; with a view to shortening the time between British and Canadian and American ports. If this scheme materializes, travellers arriving there will be repaid by some of the finest scenery in the British Isles, since they will pass close to the Achill Island, with its wild mountains and magnificent sea precipices. A little farther north in Killala Bay, General Humbert landed in 1798 with 1,000 French troops, and proclaimed the French Republic, marching afterwards to Castlebar and taking possession of the town.

Junior Farmers' Clubs Popular In Britain

Number Has Rapidly Increased In Last Three Years

Junior Farmers' Clubs, well-known in Canada, are now taking root in Great Britain. The first was organized in Devonshire in 1921, but the number has rapidly increased since that time. Until recently these clubs have all taken the form of what are known in this country as calf clubs for raising calves of good breeding. Now it is proposed to extend their activities to other lines of work, and the ministry of agriculture is lending assistance in organization.

Yukon Gold Production

Ontario and British Columbia have come to the fore to such an extent as gold producers, of late years, that the Yukon is not getting its share of credit for Canada's gold production. Year after year the placer workings of that northern portion of Canada are giving up their gold. Last year, says the Natural Resources Intelligence Service of the Department of the Interior, nearly 75,000 crude ounces of gold were taken out of the Yukon.

Hon. Marguerite Shaughnessy Launches New Vessel For Pacific Coast Service.

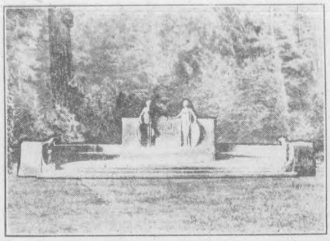
Photographed aboard the Canadian Pacific Coastal Service S.S. "Princess Marguerite," after the launching of that vessel on the Clyde, by Hon. Marguerite Shaughnessy, daughter of the late Chairman of the Canadian Pacific, who crossed the Atlantic for the purpose of performing the ceremony. From left to right: Lady Bell; Sir Thomas Bell, chairman of John Brown's Shipbuilding Company; Lady Fisher; Mr. Samson, of John Brown's; Miss Simms, secretary to Sir Thomas Fisher; Mr. G. M. Bosworth, chairman of Canadian Pacific Steamships, Ltd.; Miss Bell; Hon. Marguerite Shaughnessy; Mr. Mercer, of the Canadian Pacific; and Major Duffy, agent for the Company in Scotland.

The "Princess Marguerite" is the second Canadian Pacific vessel destined for service between Vancouver, Victoria and Seattle to be launched on the Clyde within the last three months. The "Princess Kathleen," her sister ship, will be placed early in 1925.

Erect Memorial At Vancouver To Symbolize Friendship Between The United States And Canada

Active work on a granite and bronze memorial to the late President Harding which will also symbolize the friendship between the United States and Canada will be started within a short time by the Kiwanis clubs of both countries. This memorial is to be placed in Stanley Park, Vancouver, B.C., the scene of the late President's last address.

The design of Twizell and Twizell, architects, associated with Charles Marega, sculptor, Vancouver, was officially approved by the International Kiwanis Council which has just concluded its annual meeting in Chicago.



Memorial to late President Harding symbolizing friendship between the United States and Canada, as it will appear in Stanley Park, Vancouver.

The memorial will be in the form of a combination seat and monument, 37 feet wide and 11 feet high, placed in front of towering trees. This type of memorial was decided upon as being more suitable to the site, because any shaft monument would be dwarfed by the giant fir trees of Stanley Park.

The seat will be within a few feet of the pavilion from which Mr. Harding delivered his last address during his Alaskan trip, and will be fronted by a shallow pool of water which will reflect the memorial.

In the centre of the memorial which will be erected from light gray Canadian granite from Granite Island, about 65 miles from the park, will be a bronze plaque bearing a profile bas relief of Mr. Harding and an extract from his Vancouver speech which will read as follows:

"What an object lesson of peace is shown today by our two countries to all the world. No grim-faced fortifications mark our frontiers; no huge battleships patrol our dividing waters, no stealthy spies lurk in our tranquil border hamlets. Only a scrap of paper recording hardly more than a simple understanding, safeguards lives and properties on the Great Lakes, and only humble mile-posts mark the inviolable boundary line for thousands of miles through farm and forest. Our protection is in our fraternity, our armor is our faith; the tie that binds more firmly year by year is ever-increasing acquaintance and comradeship through interchange of citizens; and the compact is not of perishable parchment, but of fair and honorable dealing which, God grant, shall continue for all time."

On either side of this bronze tablet will be female figures in bronze representing Canada and the United States, holding the shields of these two countries and with an olive wreath between them signifying peace. At the extreme ends of the memorial will be bronze American eagles.

It is planned to have the Premier of Canada and a high official of the United States attend the dedication of the memorial which symbolizes the friendship of the two countries and the cooperation of the Kiwanis clubs in objectives of civic service common to both. The memorial will prove a potent factor in further inspiring international good-will between the two countries.

Free Homesteads

Large Area of Land Taken Up In Four Western Provinces

Free grant homesteads and soldier grants taken up in the four Western Canadian provinces in 1924, up to the end of September, amounted to 526,560 acres. In Manitoba 431 homesteads and 59 soldier grants were recorded; 1,318 homesteads and 260 soldier grants in Saskatchewan; 865 homesteads and 163 soldier grants, and 172 homesteads and 23 soldier grants in British Columbia.

Serious Shortage Of Seed Oats

Over a Million Bushels Are Required In Saskatchewan

A shortage of about 1,209,000 bushels of seed oats is reported by the Seed Branch of the Dominion Department of Agriculture in 34 provincial electoral districts in Saskatchewan lying principally north of the C.P.R. main line. There is no shortage in any other kind of seed.

Surplus supplies of oats thus far recorded from Saskatchewan amount to only 140,000 bushels.

George H. Clark, Dominion Seed Commissioner, suggests the standard for No. 3 grade seed oats be lowered to a point that will take in a fair proportion of the available supply of stated No. 2 oats, which are of good quality and may safely be used for seed purposes on any land that is already more or less infested with wild oats.

A shortage of 131,000 bushels of seed oats is reported in 12 of the northern electoral districts in Manitoba, while the Dominion inspectors' records show a surplus of 97,000 bushels of oats located in the more southerly districts, including 30,000 bushels now stored in Winnipeg elevators. It is suggested by lowering the standard for No. 3 a substantial surplus could be made available for Saskatchewan.

Hungarian Farmers Coming To Canada

About 100 Families in Party Sailing On April 1

Around 1,000 Hungarians are to come to Saskatchewan this spring, according to F. J. Malonyai, Hungarian travelling representative of the White Star-Dominion steamship line. They will sail for Canada on April 1 and there will be something over 100 families in the party. All are farmers and they have arranged to settle upon land which they are now securing from the Government and by private purchase.

May Re-buy Bonds

Finland has submitted a binding offer to France to re-buy all Finnish Government bonds dated 1898, 1901 and 1903, according to unofficial reports at Helsingfors. The bonds aggregate about thirty million francs.

GET IN STEP

AT the nominations for town councillors and trustees held last Monday there was the usual scurrying around at the last minute in order to get the required number of nominees for the several vacancies.

If the law had required that no ratepayer could sign two nomination papers the nominations would have gone by default as there were just enough ratepayers turned out to sign each others papers, and it was only at the last tick of the clock that enough men had been induced to allow their names to go in nomination.

It has been truly said that the people get just whatever kind of government they want, wether it be municipal, provincial or federal. If the voters are indifferent their representatives are indifferent. If the voters are alive, and show interest, enthusiasm and appreciation their legislators will also show those qualities.

We do not say this by way of criticism of our council or school board in the past. We all know the conditions under which they have been laboring for the past few years, and the reports submitted at the annual ratepayers meeting last Monday evening, showed that both bodies had done exceedingly well under the circumstances. For that reason if for no other there should have been enough ratepayers turn out to re-nominate the retiring officials. But financing is not the only duty resting on the shoulders of town officials. There are dozens of apparently little things which active, enthusiastic ratepayers might encourage and stimulate in our officials. Such activity was never more necessary than right now when optimism appears to be in the air and better times from the Atlantic to the Pacific are being predicted on all sides.

Let us all get in step and join in the procession of progress which is just around the corner.

A GOOD LESSON

THE manner in which the government, prosecuting attorneys and judges, have gone after the defunct Home Bank directors and officials, and also government officials, during the past year, is indeed refreshing and encouraging. The handling of these cases has been worthy of the highest commendation.

By the actions of our governments and courts in this connection, our country is telling Canadians and the world that this dominion will not protect evildoers no matter what his social or financial position may be. In the language of the hunter: "The bigger they are the harder they fall."

It has been a common thing in the past to hear some people say that all politicians and leaders of big financial institutions are crooked, and are just in the business to feather their own nest. This is a mistaken idea and, we believe, is the cause of much of the trouble which some people get into later on.

It frequently happens that those who think and talk that that way get into responsible positions themselves, by a lucky turn in the wheel of fortune. Once firmly seated in their new saddle of opportunity they start in to carry out what they had allowed themselves to believe was the common custom of others holding similar positions. That this was the case in some scandals which have been brought to light in the past year or so, there is no doubt.

Fortunately for the country and the public, these ideas were nipped in the bud. The lesson learned should last for some years to come.

THE EGG SITUATION

DOWN in Winnipeg last week Magistrate Noble dismissed a charge against a local firm of exposing for sale, eggs that were unfit for human consumption. The magistrate did so on the ground that the regulations under the provisions of the Act governing grading and marketing of eggs were ultra vires and go farther than the Act contemplated.

In dealing with this case the Vancouver Sun says:

"If grading and marketing regulations in Canada have been too strictly applied to eggs, it is simply because the Canadian Government has neglected to supply the Canadian poultryman with the real protection of a reciprocal egg tariff with the United States.

"For the past two or more years these grading regulations have been trying to do the work of a protective tariff.

"It costs the American farmer 3 cents in duty to ship his eggs into Canadian markets. It costs the Canadian farmer 8 cents in duty to ship his eggs into American markets.

"The result is that the Western Canadian poultryman has a handicap of 5 cents a dozen both in the American market and his own Eastern Canadian market.

"Canadian eggs, particularly British Columbia eggs, average a much higher quality than American eggs. By setting up grading standards on the basis of Canadian egg quality, the tide of American eggs rushing in on Canadian markets has been somewhat checked.

"In short, those strict grading regulations have been the one thing that has stood between the Western Canadian poultryman and ruination.

"And now the courts of the country declare them null and void.

"With this slight protection to the poultryman tottering, the duty upon Ottawa of establishing a reciprocal tariff on American eggs to fully and legally protect the Canadian farmer from unfair American competition becomes immediate and imperative."

The Bassano Mail says Medicine Hat and Redcliff are of sugar factories, offering the bait of cheap power. The Mail says the greatest requirement of sugar beet factory is sugar beets and that the beets should be grown as near to the factory as possible. We might remind the Mail that it is much more satisfactory and economical to bring the raw material to the fuel than to bring the fuel to the raw material. The largest and most successful industries in all countries are located convenient to fuel and power, and the raw material is brought hundreds of miles to them. With coal strikes now so common the need for a sure supply of fuel, such as is obtainable in a natural gas belt is more desirable than ever.

According to newspaper reports Hon. Chas. Stewart may be the Liberal candidate for Macleod in the next federal general election. Since Mr. Stewart has some plan for reclaiming the drouth area of Alberta why not get him to run for some constituency in that area. Say the new riding of Medicine Hat.

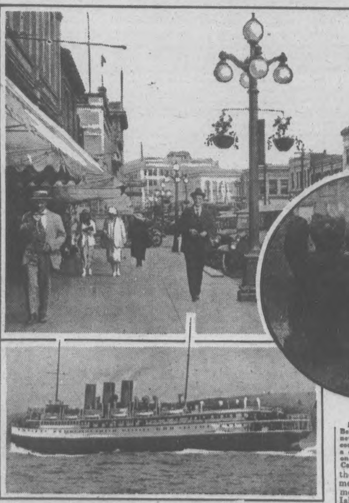
THE REDCLIFF REVIEW

Victoria Will Say it With Flowers



In the shopping district of Victoria. Below, the "Princess Kathleen," one of two new vessels which are to be placed in Vancouver, Victoria and Seattle service. Inset, a corner of the Pendray Gardens, which are one of the horticultural sights of the Capital City.

When Victoria, the evergreen city of the West bids you welcome, which it will whenever you choose to visit the capital city of British Columbia, it will "say it with flowers," and at most unexpected times and places will present bouquets for your appreciation throughout your stay, whatever the season may be.

What an extraordinary city this is. Though very young compared with many other cities on the Continent it has, no doubt through the agency of its temperate climate, drawn about itself such a mellowed atmosphere as is usually associated with more ancient places. Whatever is offensively new is given a covering or a background of foliage and flowers and it soon fits into the general scheme of things Victorian. Even down in the business and shopping districts where there is much coming and going you will find your flowers, suspended, of all places, from brackets on the street light stands.

And yet it must not be thought that this is a city of gardeners alone although one does wonder in looking over the city and its suburbs that its citizens can find time for anything other than gardening. Those who do business do it in much the same way as it is done in other up-to-date cities of its size and, unless one happens to know them, the stores of Victoria are quite a surprise. As most of the merchandise sold comes over the cheaper water routes, tourists have found it most advantageous to shop there, to the advantage of the merchants and the city generally. On this account, as much as to take care of local requirements, large stores have evolved which may be fallen back upon if ever the sights and scenery pall.

But apart from its own immediate glories and attractions, Victoria is the gateway to a land of enchantment. Hundreds of miles of good motor roads thread Vancouver Island, through the virgin forest in which the biggest firs on the continent grow, winding round mountain peaks and running out again here and there to the shore line.

With its chief city, Vancouver Island is coming into its own as a Mecca for the pleasure and health seekers. For the convenience of the increasing number of tourists who visit the Island the Canadian Pacific Railway has built two of the most magnificently appointed vessels on the West coast, to ply between Vancouver, Victoria and Seattle, and for their recreation and pleasure a huge Crystal Garden is being built, to be completed early in spring and to feature the largest salt-water swimming pool on the continent. However, Victorians pride themselves on the fact that their chief attractions are not of an artificial nature which in these days of publicity bureaus and advertising campaigns, is much more than can be said of many other fashionable resorts.

Campaign Against Religion

Communistic Plan to Establish Atheism in Russia

Gregory S. Zinovieff, Chairman of the Executive Committee of the Third Internationale, has made a significant pronouncement concerning the Communistic campaign against religion in Russia. He admits the Communists have gone too far on their propaganda against existing religious rituals and their efforts to establish atheism.

"In a peasant country like ours," he says, "where the majority of the population is illiterate, and where the peasantry pays so high for articles of necessity, we cannot allow ourselves such a luxury as a vigorous and inflexible religious campaign. We shall pursue our attacks on Almighty God in due time and in appropriate manner.

"We are confident we shall subdue Him in His empyrean. We shall fight Him whenever He hides Himself but we must go about such a question as anti-religious propaganda more carefully in the future.

"I have been informed by old workmen that not only the young Communists, but Boy Scouts, are worrying people who are religious! I have also been told that groups of Boy Scouts have imprisoned whole congregations in church while they were worshipping. This is a mistake. Our campaign against God and religion must be carried out only in a pedagogic way, not by vengeance or force."

Tidal Stream Under Bank Of England

Hidden River Is Causing Much Trouble To Architects

Architects and engineers of new buildings under construction near the Bank of England are being caused much trouble by the hidden River Walbrook, which, though covered over and forgotten in the 16th century, still flows. It pours into excavations and has to be pumped out. The deep basements of new buildings near it have to be watertight tanks. Mr. F. W. Troupe, who, with Mr. Herbert Barker, is architect of the new bank buildings, told a reporter: "The course of the Walbrook is right under the Bank of England, and may give trouble when the new building is erected.

"Until the execavations are carried out we shall not know whether it is dammed or not. The Walbrook was a tidal river—being apparently 30 to 40 feet wide at high tide—and it is still tidal.

Improving Farm Homes

Would Help to Keep Young People in Rural Communities

The farm home is the heart of rural life. The development of the home and the rural community is the real purpose of farming. If we are to keep our more intelligent boys and girls on the farm it will be necessary to improve conditions to the point where they are on a par with those in the city; otherwise our brighter boys and girls will be attracted away from the farm, and the rural communities will be deprived of the thoughts and inspirations that they are capable of giving. We cannot expect much improvement in our farms unless there is an increasing improvement in our farm homes.—The Banker Farmer.

A Small World

The professor was illustrating to his class the remarkable smallness of the world. "Gentlemen," he said, "let me tell you of my own experience. While in Paris last summer I met a man from my own home town. I met him again in Venice, still again in Alexandria, and this year, while visiting the Yellowstone, I, encountered him for a fourth time."

A disgusted voice broke in: "Aw, why didn't you pay him what you owed him in the first place?"—Stanford Chaparral.

Original Advertising

A miniature town of more than 15 buildings was constructed and placed on the stage of a London theatre simply to be burned down. The event was arranged by a fire insurance company to show how flames may be spread over an entire community, leaving destruction in their wake.

Law On Advertising

Spain has a law which controls the amount of advertising or other publicity which may be broadcast by radio. Only five minutes of this is permitted for every hour of operation.

British Columbia has two hundred women beekeepers and they are succeeding remarkably well in their unusual profession.

Wives may be bought on the installment plan in Por-loland, in Southeast Africa.

Outlook For Manitoba

Progressive Change Which Is Being Made in Agricultural Industry

In a recent public statement, Premier John Bracken, of Manitoba, said: "The year 1924 has brought a steady improvement of business conditions in Manitoba and the province has never had surer ground for facing the future with confidence. Large crop yields and stronger prices have marked the harvest and the cash returns for the crop are beginning to move in the channels of trade. The progressive change which is being made in the agricultural industry is placing it on a sounder basis by the increasing development of dairying and the raising of livestock. Grain growing will continue to be the main prairie industry and year after year will continue to create an immense amount of wealth; but in the recent years the value of the wheat grown in Manitoba has been little more than a third of the total value of all the farm and field products of the province. It can be counted upon with certainty that diversified agriculture in Manitoba will show a development even greater than the extraordinary grain development of two decades past. Our province is rich, too, in other resources, such as furs, fish, lumber and minerals."

Holds Unique Position

English Doctor Only Woman Professor Of Anatomy In World

Mrs. Mary Lucas Keene, M.D., D.Sc., is the first woman in the world to become a professor of anatomy. In appearance she is as unlike a professor as any woman could be. She is fair-haired, and looks attractive in her white working overall, which hides a smart frock.

A glimpse of her office at the London (Royal Free Hospital) School of Medicine for Women, however, reveals a skull grinning on the desk, while a complete skeleton stands in a glass case in a corner.

"That was Cullimore, a professor of literature in Germany, who left his brain and body to the school," she said. "I have put him there because we want to take care of him. I am used to him now."

Professor Keene, who was born at Gravesend thirty-eight years ago, studied medicine in opposition to her father's wishes. Her career has been meteoric, and she became lecturer in embryology in 1917. It is her favorite study, and she does research work in this branch of science in her spare time.

Curious Clock On Exhibition In Germany

Made Entirely of Straw and Is Accurate Timekeeper

A unique clock, which from the point of view of curiosity and ingenuity probably surpasses anything ever made in this line, is now on exhibition in Munich (Germany). It is made entirely of straw, is a very accurate timekeeper and contains no springs, no metal of any kind and in fact no other substance than straw, not even glue. It has been going for the past seventeen years and has required no repairs during all that time.

It is for sale for 50,000 gold marks (about $12,500) and the maker is said to have been offered this sum for it. His only reason for parting with it is to secure funds with which to build a new freak clock, without wheels, for which the plans have already been completed.—Scientific American.

Professor Invents Coal Saving Engine

Using Steam a Second Time is Chief Feature

By his invention of a "hochdruckkondensationsdampflokomotive," Professor Wurt Wiesinger, of the Zurich Technological University, has demonstrated his capacity not only as an engineer but also as a coiner of long words. The name of his invention contains no less than 37 letters and means literally "high-pressure-condensing-steam-locomotive.

It is claimed for his discovery that it will mean a saving of about 50 per cent. of coal. The chief feature is the condensing device which makes use of the escaping steam, pressing it into service a second time.

Book Returned After 102 Years

At a meeting of the newly appointed Aberdeen University Library Committee—Professor Marshall presiding—the interesting intimation was made of the return to the library of a book (the first edition of Dr. Beattie's "Dissertation") which had been borrowed 102 years ago, on September 21, 1822.

An Insurance Problem

Within the meaning of an insurance policy, it has been held in a damage case that a person in a motorcycle sidecar is not "riding a bicycle." He isn't walking, he isn't riding in an automobile, nor in an airplane nor in a boat. What then, is he doing?—Detroit Free Press.

Quits Life At Sea

Young Earl of Suffolk Says Goodbye to Former Shipmates

From a poky little cabin aboard a tramp steamer to the luxury of a Jacobean mansion, was the quick change of circumstances experienced recently by the 17-year-old Earl of Suffolk. The earl had been knocking round the world in the steamer Mount Stewart, sharing the hard life and food of sailors for about 18 months, when the death of the old earl was announced. The young man's ship had just arrived at Nantes with a cargo of nitrate from South America, and he immediately said goodbye to his shipmates and hurried to the family seat, Charlton House, near Malmesbury.

People in the district are wondering whether the young earl will settle down to society's ways, or whether the travel temperament inherited from his American mother, a daughter of the late Levi Leiter, of Chicago, will lure him away to fresh adventures.

Treating Injured Spider

Keeper Feeding Insect Which Is Rapidly Recovering

An injured zoo spider is receiving hospital treatment in London. An African silk spider, which is so named on account of the size and strength of its web, was starving to death in the midst of plenty. It had lost three legs and was therefore unable to grasp its prey. Keeper Brown fed the spider by hand, using tweezers for flies, with the result that the "patient" is rapidly putting on weight. At the next change of skin the spider will develop fresh legs. In calling the spider to meals the keeper strikes a tuning-fork and holds this against a strand of the web. The "buzz," coupled with vibration, suggests to the spider that a fly has been entrapped, and it promptly descends to the spot.

Poorer But Wiser

Mennonites Found It Unsafe to Locate in Mexico

The Mennonites who got tangled up a few years ago with the Saskatchewan Government about school regulations and wandered south to Mexico, there to spend their lives in peace and happiness with their children and children's children, are coming back in fairly large numbers. It is true that Mexico made no trouble for them about the education of their children, but the Mennonites find that a nation which does not concern itself about the education of the youth is not a safe country in which to locate.—Calgary Albertan.

Grain From the North

Grain shipments on the Edmonton, Dunvegan and British Columbia Railway this season aggregate 677,000 bushels, or 400,000 more than in 1922.

Heads Provinces In Building Highways

Saskatchewan Has Most Mileage Under Canada Highways Act

Saskatchewan has outstripped all other provinces in the building of roads under the Canada Highways Act by which the Dominion Government pays 40 per cent. of the cost, while the province foots the bill for the balance.

The Saskatchewan mileage under this scheme for the fiscal year period from April 1, 1923, to March 31, 1924, was 1,913.99. Next in the list came Manitoba, with 1,455.01 miles, and New Brunswick came third with 1,237.20 miles. Quebec built 928.22 miles, Ontario 637.79 miles, Prince Edward Island 582.43, Nova Scotia 460.30 miles, and British Columbia 268.74 miles. Alberta did not construct any highways under the scheme.

Canada At Westminster

Canadian-born Men Who Help To Administer Affairs in London

With each recurring parliamentary election in "the tight little isle," Canadian newspapers print their periodically satisfying jest relating how many Canada-born men, who had migrated to Great Britain, had been elected to Parliament or been given high position in the newly formed British ministry. The natural inference from this jest is that if the overseas dominions can send their surplus product of Statesmen back home to help the Motherland out in administering affairs at London, the daughters may be reasonably expected to shift for themselves without unsolicited advice from Downing Street. The old fetish that "the colonial" is inferior to the "Islander" is one that intelligent British opinion is getting rid of.—Louisville Courier-Journal.

Advertising A Necessity

Practically Impossible For Modern World to Remain Impervious

There is very little in modern life which is not brought to the public notice by means of advertising. It is very doubtful if anyone could go through a day without seeing, tasting, touching or hearing something which has been introduced or insinuated into his life by advertisement. We are told what to eat, what to drink, what to wear, what to ready and even how most easily to lie when we go to bed. It is practically impossible to remain impervious to advertisement.—Singapore Free Press.

Ten Cent Kind

Grocer.—What kind of soap do you want, young man?

Kid.—Give me the kind that has most perfume in it so as ma'll know when I wash my face and not make me do it over again.

A Noted Family

Remarkable Part Played By Cecils in British History

Announcement that Viscount Cecil has been declared winner of the first $15,000 peace award of the Woodrow Wilson Foundation draws attention not only to a remarkable man, but to a remarkable family. Indeed, the part played by the Cecils in British history over a period of three centuries is probably the strongest evidence behind those who, with Mr. Lothrop Stoddard, believe that there is something in human beings, as in horses, to be said for the hereditary principle. A Cecil was at the right hand of Elizabeth when the Armada came sweeping through the Channel. A Cecil went with Disraeli to the Berlin congress. A Cecil was Prime Minister of England in our own times in the person of the great Lord Salisbury. And now, after 350 years, the Cecils are still represented by three Privy Councillors, a General, a Bishop and a gifted woman biographer.—Ottawa Journal.

Used Glassed-lined Tank

Eastern States Received Milk From Chicago in Perfect Condition

A glass-lined milk tank, holding several hundred gallons, mounted on a motor truck chassis, was recently hauled from a point in the Eastern States to Chicago, and the milk, after approximately five days from the time it was drawn from the cow, arrived in perfect condition. Care was taken to cool the milk immediately after drawing. During the trip the temperature only rose five degrees. It is pointed out that this test proves that it will be feasible, when necessary, for New York City to draw on the country as far west as the Mississippi Valley for its supplies of fresh milk.

Gauged Level Accurately

Working From Either End Men Meet In Tunnel 65 Feet Deep

A notable engineering feat has been accomplished in connection with the Coatbridge sewage purification scheme at Glasgow. Two squads of men engaged tunnelling at a depth of 65 feet, 400 yards apart, and working towards each other, have been successful in gauging the direction and levels, and the two have met with complete exactness. The works consist chiefly of tunnels, and the contract amounts to £50,000.

The United States department of agriculture has received a new variety of apples from Tripoli, in Northern Africa.

Consider the fish. He never gets caught so long as he keep his mouth shut.

A Danish aviator was the first to fly over the Andes.

ANNUAL DOG DERBY AT THE PAS

Upper photograph shows C. B. Morgan's team, winners in the 1923 derby, with W. Grayson driving. In the centre is Shorty Russick, with his 1924 winners, which finished the 200-mile non-stop run in the record time of 23 hours 52 minutes. The lower photograph shows a sleigh loaded with 100 pounds weight, ready for the two-day freight race, which is an added feature of the 1925 derby.

Dog mushers in Northern Manitoba are out on the trail every day grooming their team for the eighth annual 200-mile non-stop dog derby, which is being held on February 3rd, 1925. Although the race is still some time away, more than 100 dogs are being given their daily stint of trail work in preparation for the grind. Several new teams, composed of young, well-bred wolfhound huskies are being trained and this introduction of new blood is expected to lead to a new and startling pace being set in the 1925 contest.

This year the teams will race over a new course, the Herb Lake gold camps having been set as the turning point. The starting point will be at the Hudson Bay railway bridge over the Saskatchewan River, and the teams will follow a route which is served with telephone communication so that frequent progress reports will be available.

A five-dog team freight race has been added to the programme this year to provide a new feature. In this, sleighs will be required to carry a load of 100 pounds and the team will race 30 miles each day for two days. The object of this is to promote the breeding of good freighting dogs.

The Carnival Queen contest is already attracting much interest with entries having been made from several western cities and towns. The queen and members of her court are the young ladies who secure the highest number of votes and these have all their expenses paid to and from the derby, and are also guests of honor during the entire week that the carnival is held.

City Men On Farms

Should Not Over-estimate the Qualifications of City Bred Men

The Montreal Star apostrophizes the city man on the western farm. A number of notable successes enable The Star to refute the popular claim that men from the cities make indifferent farmers or that there is "less stamina, less grit, less of that agglutinative obstinacy, which is akin to courage, which defies hardship and laughs at difficulty, in the city man than in the country boy." That is very true, as any number of successful western farmers will testify; but it is possible to over-estimate the qualifications of city bred men and under-estimate those of country bred boys. The great majority of our successful farmers were country born and bred. They do not attract unusual attention because it is taken for granted that they should know their business. City bred men who have made a success at farming are singled out for special mention because they have done something which no one formerly regarded them as capable of doing. "The wonder is not that he does it so well, but that he can do it at all," said a gentleman who had been lured into a sideshow at a fair to see a dog stand on one leg. There is something of that attitude in the present exaltation of the city man as a farmer.

The first essentials to success in farming in the prairie provinces today are brains and patience; and those qualities are not confined to men born in the country or to men born in cities. Any number of city men have been abject failures on the land. Any number of farm boys have made good. Given the qualities mentioned and robust health, any man can make good in farming in this western country today, whether he started life in a cotton mill or on a farm.—Regina Leader.

Saving Waste Paper

Six Tons of Waste Paper Saves An Acre of Pulpwood Timber

During the war many organizations were engaged in collecting waste paper and numerous undertakings were financed by this means. There is an enormous waste going on continually in the destruction of this used paper. It is used chiefly in the manufacture of building paper and paper board, in which it represents 80 per cent. of the material. Canada's forests are called upon to provide new woodpulp if waste paper is not available. Every six tons of waste paper collected saves an acre of pulpwood timber from the axe. The intensive cutting of the forest can only mean one result. If we can delay the final destruction by collecting and making available for further use the large amount of waste paper now destroyed, says the Natural Resources Intelligence Service of the Department of the Interior, it will be to Canada's advantage.

An Old English Custom

Ringing of Curfew Bell Established by William the Conqueror

Our English word, curfew, is derived from two French words meaning cover fire, that is, extinguish fire. The curfew bell was established in England by William the Conqueror, who began to reign in 1066. By this regulation it was ordered that a bell should be rung in every town at 8 o'clock in the evening in winter and at sunset in summer, when all fires and lights had to be extinguished. It was a call to prayer, an intimation that it was bedtime, and a means of guarding against fire. The custom of ringing the curfew as an intimation of the approach of night was continued down to the seventeenth century, or even later, though the obligation to extinguish fires had, of course, been long since abandoned.

A Lloyd George Retort

A political campaigner back from Lancashire tells me (writes a London Daily News contributor), that the best unreported retort he heard during the election came from Mr. Lloyd George. During a speech at a wayside station a persistent heckler, having fired off every question he could think of, at last demanded: "Mr. Lloyd George, what do you think of purgatory?"

The lightning reply was:—"You can go farther and fare worse."

Are Welcome To It

The Soviet Government has allocated 400,000 acres of land in the Volga and Northern Caucasian regions for settlements by Russians returning from Canada and the United States. The returning colonists will be encouraged to establish agricultural stations and develop the soil generally.

Famous Painting Restored

Leonardo da Vinci's fresco masterpiece, "The Last Supper," showing Christ surrounded by his apostles the night before the ordeal on Calvary, has been restored by Prof. Oreste Silvestri. Five months of painstaking labor were expended on the scene by Silvestri.

A Romance of the Spanish Main

CAPTAIN BLOOD

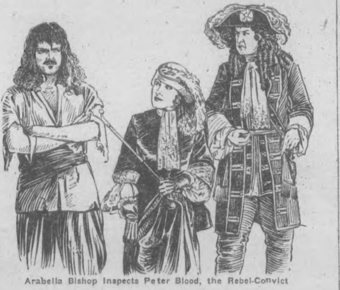
By RAFAEL SABATINI

Copyrighted, 1922, by Rafael Sabatini

"CAPTAIN BLOOD," a Vitagraph picture with J. Warren Kerrigan in the title role, is an adaptation of this thrilling novel.

SYNOPSIS

Peter Blood, a young Irish physician, who had taken up his residence in Bridgewater after years spent in the wars on the continent, although he is in his early thirties, is summoned by Jeremiah Pitt to treat Lord Gildoy who has been wounded in the battle between the Duke of Monmouth's followers and the loyalists at Oglethorpe's Farm. Blood finds His Lordship in the home of a yeoman, Baynes. He treats the wound and the King's soldiers under brutal Captain Hobart take possession of the house and threaten immediate hanging for the inmates whom he designates as rebels. Blood pleads that in Christian countries Christian men do not make war upon the wounded nor those who give them succor. Hobart declares that there are gallows on the road and those present will decorate them. Hobart demands the name of the impertinent medicus and when Peter Blood reveals himself, the British captain recognizes him as one whom he had known in Tangiers. Blood saves the lives of Pitt and Baynes for the time by his clever wit and Lord Gildoy is carried out on a day-bed to prison. Blood, Pitt and Baynes are also bound and placed under arrest as rebels.



Arabella Bishop Inspects Peter Blood, the Rebel-Convict

CHAPTER III.

The Lord Chief Justice

It was not until two months later, on the 19th of September, that Peter Blood was brought to trial at Taunton Castle upon a charge of high treason. The hall, even to the galleries—thronged with spectators; most of whom were ladies—was hung in scarlet. At the upper end, on a raised dais, sat the Lords Commissioners, the five judges in their scarlet robes and heavy dark periwigs, Baron Jeffreys of Wem enthroned in the middle place.

From Baynes, who pleaded not guilty, the clerk passed on to Pitt, who boldly owned his guilt. The Lord Chief Justice stirred at that.

The only witness called for the King was Captain Hobart. He testified briskly to the manner in which he had found and taken the three prisoners, together with Lord Gildoy. Upon the orders of his colonel he would have hanged Pitt out of hand, but was restrained by the lies of the prisoner, Blood, who led him to believe that Pitt was a peer of the realm and a person of consideration. And it was upon this flimsy evidence that the three men were sentenced to death for high treason.

The tribulations with which Peter Blood was visited as a result of his errand of mercy to Oglethorpe's Farm contained two sources of thankfulness; one that he was tried at all; the other that his trial took place on the 19th of September. Until the 18th, the sentences passed by the court of the Lords Commissioners had been carried out literally and expeditiously. But on the morning of the 19th there arrived at Taunton a courier from Lord Sunderland, the Secretary of State, with a letter for Lord Jeffreys wherein he was informed that His Majesty had been graciously pleased to command that eleven hundred rebels should be furnished for transportation to some of His Majesty's southern plantations, Jamaica, Barbados, or any of the Leeward Islands.

This command was not dictated by mercy. Slaves were urgently required in the plantations. A thousand prisoners were to be distributed among some eight courtiers. These prisoners were to be kept there for the space of ten years before being restored to liberty, the parties to whom they were assigned entering into security to see that transportation was immediately effected. Peter Blood, and with him Jeremy Pitt and Andrew Baynes, were conveyed to Bristol and there shipped with some fifty others aboard the Jamaica Merchant. Eleven died, and amongst these was the yeoman from Oglethorpe's Farm.

CHAPTER IV.

The Slave Market

Towards the middle of December the Jamaica Merchant dropped anchor in Carlisle Bay, and put ashore the forty-two surviving rebels-convicts. They beheld a town of sufficiently imposing proportions.

A fort guarded the entrance of the wide harbour, with guns thrusting their muzzles between the crenels, and the wide façade of Government House revealed itself dominantly placed on a gentle hill above the town. On a wide cobbled space on the sea front they found a guard of red-coated militia drawn up to receive them.

To inspect them came Governor Steed. After him, in the uniform of a colonel of the Barbados Militia, rolled a tall, corpulent man who towered head and shoulders above the Governor, with malevolence plainly written on his enormous yellowish countenance. At his side, and contrasting oddly with his grossness, moving with an easy stripling grace, came a slight young lady in a modish riding-gown. The broad brim of a grey hat with a scarlet sweep of ostrich plume shaded an oval face upon which the climate of the Tropic of Cancer had made no impression, so delicately fair was its complexion. Ringlets of red-brown hair hung to her shoulders.

Peter Blood caught himself staring in a sort of amazement at that piquant face, which seemed here so out of place, and finding his stare returned, he shifted uncomfortably. He was in no case for inspection by such dainty eyes as these. Nevertheless, they continued to inspect him with round-eyed, almost childlike wonder and pity. Their owner touched the scarlet sleeve of her companion. The colonel plainly gave her no more than the half of his attention. His little beady eyes were fixed upon fair-haired, sturdy young Pitt, who was standing beside Blood. The Governor had also come to a halt.

"My dear Colonel Bishop, it is for you to take first choice and at your own price. After that we'll send the rest to auction."

Colonel Bishop nodded his acknowledgement and advanced alone towards the rebels-convict. Before the young Somersetshire shipmaster he came to a halt, and stood an instant pondering him.

"Fifteen pounds for this one."

The master of the convict ship made a face of dismay. "Fifteen pounds! It isn't half what I meant to ask for him."

"It is double what I had meant to to give," grunted the Colonel. They bargained and Pitt was taken at twenty pounds.

Peter Blood lost himself in unprofitable speculations. He was in no mood for conversation, nor was Pitt, who stood dumbly at his side. To Pitt, this separation was the poignant climax of all his sufferings. Blood noticed that the girl was speaking to Bishop, and pointing up the line with a silver-hilted riding-whip she carried. Then, slowly, they came until the Colonel was abreast of Blood. He would have passed on, but that the lady tapped his arm with her whip.

"But this is the man I meant," she said.

"This one? Bah! A bag of bones. What should I do with him?"

He was turning away when Captain Gardner interposed.

"He may be lean, but he's tough; tough and healthy. When half of them was sick and the other half sickening, this rogue kept his legs and doctored his fellows. Say fifteen pounds for him, Colonel. That's cheap enough."

(To be cointinued)

PAINS ACROSS THE BACK

Relieved by Lydia E. Pinkham's Vegetable Compound

Mitchell, Ontario.—"I have taken your medicine for a number of years. I do not take it steady all the time, but I am never without it. I always keep it in the house. I took it first for pains in the abdomen and bearing-down pains, headaches and pains across the back. I have my home to look after and many a day I could not get up at all. I saw the advertisement in the paper about Lydia E. Pinkham's Vegetable Compound, and Mrs. John Miller told me about it, too. Every time I take it, it makes me feel better and I always recommend it to my friends. I am willing to answer letters from women asking about this medicine and you may use this letter as a testimonial."—Mrs. F. J. WASSMANN, Mitchell, Ontario.

The merit of Lydia E. Pinkham's Vegetable Compound is told by women to each other. Many women know by experience what this medicine will do and they are anxious for others to know.

Such testimony should cause any woman suffering from the troubles so common to her sex to give this well-known medicine a fair trial.

Do you know that in a recent canvass among women users of the Vegetable Compound over 220,000 replies were received. To the question, "Have you received benefit by taking this medicine?" 98 per cent. replied "Yes."

This means that 98 out of every 100 women are in better health because they have given this medicine a fair trial. C

George Eliot's Letters Burned

Would Have Contributed Greatly To English Literature

Letters which would undoubtedly have formed an important contribution to English literature have just been carefully and solemnly burnt.

They were written by George Eliot, the famous novelist, and in them the writer of "Adam Bede," "The Mill on the Floss," and other great books, wrote freely and frankly of her work, the books she was engaged upon, her domestic affairs and her travels. They were of particular interest in that they were in the novelist's own handwriting and reflected in an intimate way the life of her time.

Establishing Bank of England

Act Received Royal Assent On April 25, 1694

The act of the English Parliament authorizing the establishing of the Bank of England, received royal assent on April 25, 1694, and the charter was granted on July 27, following. The bank commenced operations on January 1, 1695, at Grocers' Hall, Poultry. The foundation of the present banking house in Threadneedle Street, London, was laid on August 1, 1732, by Sir Edward Bellamy, Governor, and the bank removed there on July 5, 1734. During the past few months the building has been added to by the erection of two stories.

A Compliment

"I heard something nice about you today."

"Yes?"

"Yes, a friend of ours said you resembled me."

Motor Across Sahara

King Albert of Belgium is considering an automobile trip across the Sahara early in the new year, according to unofficial reports.

AT THE FIRST SNEEZE

Heat and inhale Minard's. Also bathe the feet in Minard's and hot water.

An Unique War Memorial

Ex-service Man Building Swiss Chalet In Hampshire Village

The little village of Hedge End, in Hampshire will shortly own in a completed state one of the most unique war memorials in England. It is in memory of the men of the county, and is being built in Swiss chalet style, entirely by an ex-service man. He has devoted the whole of his leisure to the task for many months, and the memorial contains many symbolic figures and inscriptions, as well as medallions containing the names of war celebrites. In it is a model of the Europa, and on the ceiling are about eight hundred wooden diamonds bearing regimental crests, colors, ribbons, buttons, divisional and corps signs, and the crests of all the ships in the British navy.

What Is Education?

Answering the Question Is Harder Than It Looks

Is the solving of crossword puzzles valuable as an educational exercise? There is one college in the United States—a college of engineering in Kentucky—which evidently believes it is, for it has added a course of crossword puzzles to its curriculum.

The decision is far from unanimous however. Somebody can set up the claim that anything which serves to develop the memory is educational, and even this is disputed. Before the argument is finally settled it will probably be necesasry to come to an agreement as to what it meant by education. And that would probably prove to be a harder task than at first it would seem.—Stratford Beacon-Herald.

Made Good On First Job

New York Millionaire Started His Career Licking Stamps

Otto H. Kahn, of New York, financier, art patron and all around public man, recently announced in a speech to members of the Harvard Business School Club, that he started his career by becoming an expert in licking stamps. In his first job the firm employing him sent out hundreds of circulars daily and at that time sponges for wetting stamps were an unknown luxury. The process of applying the stamps was the natural one of licking, and by dint of practice and devotion to duty the future millionaire became so expert that he attracted the attention of his "boss," who promoted him to a less arduous branch of physical activity.

Dangerous Word When Motoring

Asking Driver to "Look" Has Caused Many Accidents

The most dangerous word in all of motoring is "look." "Oh, John, look at those girls in bathing," or similar demands on the driver's eyesight have sent many a car into the ditch and many a motorist to the law courts or worse.

When commanded by passengers to "look quick," the person at the wheel should take two looks, the first one ahead to see that the road is clear and that there are no crossroads to empty other cars or children on bicycles into the path. Then a rapid inspection of the funny scarecrow or wondrous view may possibly be permissible for a few seconds.—Collier's.

How Bees Communicate With Their Associates

Eminent German Professor Says They Rely On Dancing

An eminent German professor who has made a profound study of bees states that bees do a sort of fox trot and rely much on their dancing as a means of communicating ideas to their associates. In experiments the professor said he learned that bees send out scouts to search for food. The scouts, if successful, return to the hives and then execute a dance, which attracts their associates who smell the perfume the scouts have collected and then follow the scouts back to where the food awaits them.

First Balloon Ascent In England

The first balloon ascent in England was made on September 15, 1784, by Vincent Lunardi at Moorfields, near London. On January 7, 1785, Blanchard and Jeffries ascended at Dover and crossed the English Channel, alighting at Calais, France. The first ascent in Ireland took place on January 19, 1785, from Ranelagh Gardens, Dublin.

Russian Ports Admit French

All Russian seaports are now open to merchant marine ships flying the French flag, while similar treatment is accorded Russian tonnage in French ports.

The highest town in the world is Pasco, in Peru, standing 14,275 feet above sea level.

Would Pool War Debts

France Thinks In Strict Justice Something Should Be Done

The French Government, in taking stock of its financial position, and groaning under the appalling war indebtedness, has issued a statement which says:

"If one leaves the judicial ground to rise to higher views of co-operation and equity, strict justice would seem to demand a pooling of war expenses and their distribution among the allied states proportionally to the riches of each and without keeping account of the particular engagements undertaken because of momentary necessities.

Another argument for a reduction is that the United States and Great Britain collected taxes on business done with the money loaned France, and, therefore, that amount should at least be deducted. The reduction of German reparations is also advanced in support of better terms for inter-allied debts, but "France does not mean," the statement concludes, "to repudiate any contracts she made, and her signature will always be sacred to her."

New World Getting Old

Chicago Finds That Is Has Reached the Age of 250 Years

Preparing to celebrate its birthday, Chicago is rubbing its eyes in astonishment over its newly discovered ripe old age. Our big neighbor confesses to being 250 years old, dating its origin back to 1674 when Father Marquette put up the first building.

Chicago's discovery of its remote and almost medieval origin reminds us that the whole New World is gradually getting old. We are now the leading world power, and it is time for every part of the country to provide itself with a respectable ancestry. The comparatively modern Columbus is no longer regarded as a fitting starting-point for American history. We like to begin our history with Leif Erickson, and if there were any way of stretching Leif's problematical wanderings as far as the great lakes the discovery would be welcome.—Milwaukee Sentinel.

Batteries That Will Last

Birmingham Scientist Claims Discovery of New Source of Electricity

If a Birmingham scientist's theories become actualities, electric batteries that will last thousands of years before running down are a possibility of the near future.

Mr. J. B. Kramer, of Birmingham, England, claims to have discovered a new generative source of electricity by which energy will be drawn in limitless quantities from vast natural resources of radio-active substances and harnessed to the service of mankind. Fuel and chemicals are not needed.

There are some kinds of sands on the shores of India and elsewhere which are radio-active, and upwards of twenty different minerals have similar properties. Most of these substances endure for thousands of years, and the energy would be good for the whole of the time.

Compulsory Test For Printing Apprentices

Toronto Typographical Union Will Mentally Measure Future Members

Scientific measurement of the fitness of apprentices for the printing industry has been made a compulsory test for admission to the Toronto Typographical Union. Henceforth no youth will be accepted for membership in the union until he has passed a set psychiatric test. It is stated that there is no other labor union in the world thus mentally measuring its future members.

Giant Python Escapes

Took Four Men to Rescue Attendant From Coils

Aroused by heat, a 24 foot python, reputed to be one of the largest specimens in Europe, escaped from a sack in the office of a London zoo importer. The first knowledge that anything was amiss came when the snake, with a hiss like escaping steam, lashed out at an attendant, and quickly enveloped the unfortunate man in its coils. Four men battled for an hour against the infuriated python before they succeeded in forcing it to uncoil and reenter its sack.

Old Ladies Take Up Boxing

Miss Joe Davidson, 77, and Mrs. Ann Peabody, 80, members of the Old Ladies' Home at Atlanta, N.Y., have become so interested in boxing that they have started sparring in order to "keep in good trim." They became interested in the sport recently when it was announced a boxing match soon would be held for the benefit of the home.

French judicial officials never ride in public vehicles as a matter of professional etiquet.

A Fortunate Sea Captain

Received $47,500 For Ambergris Found Floating On Sea

A sea captain was recently fortunate enough to pick up a piece of ambergris, which was floating on the sea. He sold the lump in London for $47,500, as it was of a rare golden variety, the market price of which averages at $50.00 an ounce. This valuable substance, the basis of so many perfumes, is due primarily to the sperm whale's fondness for cuttle fish. The whale devours greedily these exceedingly repulsive-looking creatures. Their horny beaks, however, are incapable of being digested, and set up an irritation which produces the precious ambergris, much as a pearl is produced by an oyster under stress of the irritation caused by a grain of sand.

SAVED BABY'S LIFE

Mrs. Alfred Tranchemontagne, St. Michel des Saintes, Que., writes:—"Baby's Own Tablets are an excellent medicine. They saved my baby's life and I can highly recommend them to all mothers." Mrs. Tranchemontagne's experience is that of thousands of other mothers who have tested the worth of Baby's Own Tablets. The Tablets are a sure and safe medicine for little ones and never fail to regulate the bowels and stomach, thus relieving all the minor ills from which children suffer. They are sold by medicine dealers or by mail at 25 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

LITTLE HELPS FOR THIS WEEK

Speak not evil one of another.—James iv., 11.

Nay, speak no ill; a kindly word
Can never leave a sting behind;
And oh! to breathe each tale we've heard,
Is far beneath a noble mind.
For oft a better seed is sown
By choosing thus a kinder plan;
For if but little good we've known,
Let's speak of all the good we can.

Remember that charity thinketh no evil, much less repeats it. There are two good rules which ought to be written on every heart—never believe anything bad about anybody unless you positively know it is true; never tell even that unless you feel that it is absolutely necessary, and that God is listening while you tell it.

—Henry Van Dyke.

Many Bad Eyes

Tests of autoists at the Canadian National Exposition in Toronto, showed that 41 per cent. of the drivers fell below standard. One driver was shown to have only 25 per cent. of normal vision.

Although commonly regarded as a desert plant, the date palm must have its root constantly kept wet in the marshy soil of an oasis.

Familiarity with several languages is required of nearly all girls employed in shops and offices in Switzerland.

MRS. LIZZIE ALMAS

HERE IS THE REASON WHY CANADA HAS SO MANY HEALTHY WOMEN!

Toronto, Ont.—"Dr. Pierce's Favorite Prescription can be relied upon as a woman's medicine. I found it so very beneficial that I do hesitate to recommend it to others who suffer. I had suffered with a severe nervous breakdown, caused thru my having feminine weakness. I had no control whatever over my nerves, could not sleep and I suffered with backaches and pains extending down into my limbs. I also had severe bearing-down pains. I was a physical and nervous wreck when I was advised to try Dr. Pierce's Favorite Prescription. It put me right on my feet and removed all the trouble. My nerves became strong and I did not suffer any more with any of the above ailments."—Mrs. Lizzie Almas, No. 235 Ontario Street.

All druggists. Liquid or tablets. Write Doctor Pierce's Invalids Hotel, Buffalo, N. Y., for free medical advice, or send 10c for trial pkg. of tablets to Dr. Pierce's Laboratory in Bridgeburg, Ont.

H. B. Co. Gets Land

6,639,000 Acres of Western Canada Land As Final Settlement

Under an agreement between Hon. Chas. Stewart, Minister of Interior, and the Hudson's Bay Company, the company is to receive 6,639,000 acres of land in Western Canada in final settlement of the terms of purchase entered into in 1867.

The land is to be selected from the "fertile belt," which is bounded by the Rocky Mountains, the Saskatchewan River, the Lake of the Woods and the international boundary.

The history of the dispute dates back to the time when the Canadian Government agreed to pay a certain sum of money and give other considerations of land, etc., in order to compensate the company for the retirement of its charter. The agreement provided that among other considerations the company was to receive one-twentieth of the land in the "fertile belt" before mentioned. There arose a disagreement as to whether Canadian reserve, etc., should be classed in the total of which the company was to receive a twentieth part, and the negotiations have been proceeding for years and years. The company claimed 7,100,000 acres, but finally agreed to accept 6,639,000 acres as final settlement of the terms of the 1867 agreement.

Another Air Mystery

Two Members of Royal Air Force Disappeared July 24

To the many unsolved mysteries of the air has been added another in the disappearance of First Lieutenant W. T. Day and Pilot Officer D. R. Stewart, two members of the Royal Air Force in Isaq, who set out on July 24, from their aerodrome at Shaibah, and never returned.

Their abandoned machine was found in a lonely part of the desert. It was intact, there was petrol in the tank, and as a matter of fact it was afterwards flown back to the aerodrome. The most exhaustive search has failed to discover any trace of the missing airmen.

Pain In The Muscles, Stiffness In Joints,

Quickly Subdued By Nerviline

Those who have tested out numerous liniments will agree that where something is needed to dislodge a deep-seated, more or less chronic condition there is nothing to compare with Nerviline. It's because Nerviline penetrates so deeply, because it has about five times the strength of the ordinary oily preparation, it has come to be known as **King over all Pain**. For Rheumatic conditions, muscular and joint stiffness, Nerviline works wonders. A trial proves this. Get a 35 cent bottle from your dealer to-day.

Keeping Oneself Fit

Surgeon-General Cumming's report on the increased span of life should be read in connection with a recent statement by Dr. Charles H. Mayo. "All science can do for a man over forty," he said, "is to persuade him to look over his machinery and keep it from disintegrating through neglect."—Buffalo Courier.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Another Scientific Discovery

German Professors Claim Solid Insulin New Diabetes Remedy

A new help for sufferers from diabetes in the form of a solid insulin named insulingual is offered by Professors Kraus and Goldscheider, of Berlin University medical clinic.

Insulingual is insulin in the form of a solid powder, which can be rubbed on the tongue and thereby absorbed directly into the blood. This is considered to be scientifically interesting, because the discoverers of insulin, Banting and Best, of Toronto, Ont., are reputed to have held that treatment by insulin was possible only through injections.

Beauty Hints For Girls

There recently appeared in the advertising columns of a popular newspaper an offer, for one shilling, of a recipe by the use of which the hands would become soft and beautifully white. Many thousand of girls responded, and in due time received a piece of paper containing the following words: "Soak the hands three times a day in dishwater, while mother rests."

An Ancient Hindu

A London police magistrate was host to a thousand-year-old man recently. The Hindu was arrested on a charge of intoxication and several days later entered a plea for "mercy" on the grounds that he was "an old, old man"—just how old he didn't know—"but at least a thousand years." He claimed to have invented a "long life medicine."

Minard's Liniment for Sprains and Bruises

Business In West Improved

Spirit of Optimism is Prevalent Throughout the Country

Business conditions in Western Canada and British Columbia, according to press statements, shows a general and consistent improvement over conditions of recent years, it is agreed in quarters which are in close touch with the situation. While there is nothing approaching a boom anywhere, the sale of a fair crop at high prices has put into circulation in the prairie provinces, large sums of money and there is a spirit of optimism everywhere, and confidence that the improvement will be continued and developed in 1925.

Only a portion of the crop money has reached the producers as yet, but the result has been very marked. Large numbers of obligations to mortgage and implement companies and to the banks have been liquidated wholly or in part, and while the farmers are handling their funds with a good deal of caution, considerable general purchasing has been done. Wholesale houses report that sales are increasing in number, although individual orders are not heavy, and this condition is reflected in the retail trade.

Sending Orders By Radio

New York Central Railroad Uses its Harbor Fleet

Officials of the New York Central lines and the Radio Corporation tested the availibility of radio equipment of tugs, navigating floats and lighters. The railroad had a fleet of 43 such craft and the experiments were made with a view to determining if it would expedite their movements to direct them by radio instead of by orders from land docks as heretofore.

The apparatus used was one of the latest developments of the Radio Corporation and eliminated interference from broadcasting stations sending out concert and other programmes. The trial was said to have been satisfactory.

Biggest Find Of Century

Sailless Ship Will Revolutionize Navigation is Prediction

Anton Flettner, the German inventor of the wind-driven but sailless ship, claims that the trial trip of his vessel was "successful beyond expectations." And he declares that "its extraordinary superiority over ordinary sailing ships in exploiting wind-power was shown beyond dispute." Already there are predictions that this new type of vessel will revolutionize ocean navigation—that it will abolish sails and even, in a large degree, supplant steamships.

If the new ship is all that it is represented to be and can accomplish all that is claimed for it, Herr Flettner has hit upon one of the biggest finds of the century.—Hamilton Herald.

Record For Tourist Traffic

Heavy Revenue Derived From This Source of Income

Tourist traffic in Canada for 1921 is likely to constitute a new record, is the opinion J. B. Harkin, Commissioner, Canadian Government National Parks, has formed after watching the situation closely and securing information from various sources. No estimates, he says, have been compiled, but his statement of a new record indicates a value of the traffic to the Dominion above that of 1923, which was carefully estimated at $136,000,000.

Placing this value at $136,000,000, tourist traffic occupies third position in comparison with the leading Canadian exports for 1923.

Englishmen Claim Credit

State They Held Patent Rights For Sailless Ship In 1915

The sailless ship discovery, for which Germany so far has held the credit, is now claimed by two Englishmen, brothers, one, a coal exporter of Hull, and the other a resident of Newcastle-on-Tyne. The brothers state that they base their claim on the fact that they applied for patent rights for this identical principle on June 26, 1915, and that their claim was accepted and granted by the Patent Office on February 26, 1917.

"Colorful" Student Body

Columbia University claims the most colorful student body in the country. In the lisct of twenty thousand names published, are: Fifty-eight Browns; 40 Whites; 22 Greens; 16 Grays; 3 Blacks; 2 Tans; 1 Red; 1 Blue; and 1 Orange.

It is said that the pleasure of travelling is not in the arriving. Well that depends on where you are going.

You never can tell. A fellow does not always go broke from being thrown on his own resources.

Twenty-nine million herring were landed recently at Lowestoft, England, in two days.

Simple Colds indicate a need of SCOTT'S EMULSION to build resistance

Britain Will Build Two Battleships

To Carry Nine 16-inch Guns With 30,000-yard Range

The new British battleships Rodney and Nelson, first 35,000-ton post-treaty capital ships to be built, will carry nine 16-inch guns, 50 calibre wire-wound guns mounted three to a turret with all three turrets in the forward part of the ships, a house naval sub-committee has been informed by Captain Harry H. Hough director of naval intelligence.

By comparison with the United States 16-inch gun class ship, the West Virginia, Colorado and Maryland, and the Japanese equivalent, Matsu, the Rodney and Nelson will be of greatly increased size and power, and will have a gun range in excess of 30,000 yards.

HEART WAS WEAK NERVES ALL GONE

Mrs. J. H. Hallenbeck, 117½ Welland Avenue, St. Catharines, Ont., writes:—"I was in a gas explosion; it left me with a weak heart, and my nerves were all gone. I suffered everything; couldn't sleep, or endure any excitement, and when left alone I felt as if I could scream. I took dizzy spells, often falling and bruising myself. My mother read about your Milburn's Heart and Nerve Pills, and bought me a box, but having taken so many different kinds of medicine it just seemed that I did not have any confidence in any of them. I took one box of H. & N. Pills, and felt so much better I continued with them until I had used five boxes, and after I had taken them I did not need any more. I cannot praise, or recommend, Milburn's Heart and Nerve Pills too highly after all they have done for me."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Radio Growing In Germany

Subscribers Increase From 2,000 To 500,000 In Year

The growth of radio in Germany is strikingly illustrated by figures given out by the post office department, which is in control of the radio casting field. Whereas at the beginning of the year only 2,000 radio subscribers were listed with the department, Christmas finds 500,000 subscribers. Dr. Hans Bredow, the minister in charge of the service, estimated that the number of subscribers per month will average about 100,000 for some time to come.

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Eclectric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Communism Waning

Justice, organ of communists in England, reports that their party's membership is diminishing rapidly in ever country of Europe. Even Russia, with over a million members in 1920, now is listed under 600,000. Communism is an extremist's belief. Extremes never last in politics or economics. Nor is any extreme ever right. Common sense always is somewhat around the "happy medium."—Saskatoon Star.

International Show

Geneva, home of the League of Nations, is planned to be host next September at an international radio exposition. All the nations of the world are expected to participate.

Don't Get Bald Cuticura Does Much To Prevent It

Dandruff, itching and scalp irritation point to an unhealthy condition of the scalp which leads to falling hair and premature baldness. Frequent shampoos with Cuticura Soap do much to prevent such a condition, especially if preceded by a gentle anointing with Cuticura Ointment.

Sample Each Free by Mail. Address Canadian Depot: "Cuticura, P. O. Box 2616, Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Try our new Shaving Stick.

Success With Alfalfa

By James D. McGregor, Glencarnock Stock Farms, Brandon, Manitoba

Part 5—(Continued)

While alfalfa is one of the oldest known agricultural plants it is apparently just beginning to be recognized and its true value appreciated in Western Canada.

In my opinion the secret in growing alfalfa is largely due to the genuine Grimm seed being used, preferably produced as near where you are going to sow it as you can possibly get it.

Baltic is simply another name for Grimm and is exactly the same strain and comes from the same parent stock.

Alfalfa, either hay or green, as feed for all kinds of farm animals, is the most highly nutritious and palatable forage crop that can be grown. It is particularly valuable as a feed for dairy cows. When properly cured, it has more nearly the effect of good June pasture than any other feed. It is a well known fact that wheat bran is worth only slightly more than alfalfa hay, and when the palatableness of the hay is taken into consideration, this difference also disappears. The dairyman feeding bran with the ordinary roughages such as prairie hay, timothy, or corn fodder, could well afford to exchange one-half his bran for an equal number of pounds of good alfalfa hay. Alfalfa hay, corn silage and a small amount of ground oats, make an ideal dairy ration.

For fattening beef cattle, alfalfa has no equal as a roughage. It is generally figured that it will require 1,000 pounds of grain to produce 100 pounds of beef on mature cattle, with the ordinary roughages such as prairie hay or corn fodder. When good alfalfa hay is fed with the corn, the amount of grain required will be reduced nearly one-half. This fact holds true with the feeding of all classes of livestock. The alfalfa balances the ration to such an extent that less other feed is required to make a given gain. This is particularly true with young stock, which require a large amount of the growth-producing element, protein.

It has been demonstrated that an acre of alfalfa will produce 776 pounds of pork during a season. This calculation was made by deducting the probable gain due to a small amount of grain which was fed while the hogs were on pasture. It is possible to winter mature hogs on good alfalfa hay and only a very small amount of grain.

Alfalfa pasture is the very first green thing on the farm in the spring, and remains green all summer. Every farm in Western Canada should be equipped so as to keep six or eight brood sows. Pigs farrowed in March or April are ready to use the alfalfa pasture as soon as it is large enough. By June 15, hulless barley is ripe and ready for the pigs to be turned into it, and will hold them until the corn is ready. By August 15 the pigs are just the right size to turn into a field of early Flint corn, which they convert into ham and bacon at the least possible expense.

Alfalfa, both green and as hay, is also fed to horses. When beginning to feed alfalfa, care should be taken that horses do not get more of it than is good for them, as it is so much richer than other hays. Alfalfa hay alone is too rich a feed for horses. There should always be some grain or roughages, such as oats, corn fodder or prairie hay, fed with it. When fed exclusively, it is likely to produce coarseness, especially in colts.

The value of alfalfa for sheep is attested by the fact that the irrigated regions of Alberta are full of sheep feeding quarters, where large flocks are fattened each winter on alfalfa hay and grain.

Alfalfa is a great poultry feed, either eaten green from the fields in the summer time, or chopped and fed in the winter. Chopped hay or meal mixed with a small amount of grain, put in a barrel or tub, and hot water poured over it and allowed to steam for a few hours, will be eaten as greedily as green feed in the summer time.

After growing alfalfa ourselves continually for the past fifteen years, as part of our Glencarnock farming operations, we can say conclusively that we have found it to be one of the most valuable feed crops we can produce on our farms and we are increasing our acreage of alfalfa each year.

Family Starts New Nation

The Spilloni family has built up a new nation on a small, obscure island off the coast of Italy. They do not pay taxes to the Italian Government, but live by themselves with fishing as their only means of support. There are 13 in the family and they have organized a republican form of government with a written constitution.

Brandon's Population

According to City Assessor McIntyre, who has been engaged in a census of the city, the present population of Brandon is 16,536. He states that there will be very little change in the land and building assessment of the city for 1925.

For First Aid—Minard's Liniment

Treat Colds Externally

For sore throat, bronchitis or deep chest colds, rub Vicks VapoRub briskly over throat and chest and cover with warm flannel.

Vicks acts in two ways—both direct: *absorbed* like a liniment and *inhaled* as a vapor. A quick relief for the cold troubles of all the family.

Medals For the Asking

Thousands of Victory Medals To Be Awarded Rightful Owners Upon Application

A total of 166,030 badges of death-defying service in the world war are still going begging in this Dominion, according to information from the Department of Soldiers' Civil Re-establishment. Of these, 85,301 are British war medals and 50,503 are Victory medals, and they are to be had by their rightful owners simply for the asking. "The delay in distributing these awards," says an official of the department, "is due entirely to the fact that the addresses of the recipients are not available at national defence headquarters. Since the beginning of the issuance of awards for war service, the D.S.C.R. has to date distributed 964,535 medals, decorations and commemorative scrolls.

Beef Exports To Britain

Canada's Fresh Meat Trade With United Kingdom Growing

Canada exported 1,341,900 pounds of fresh beef to the United Kingdom during the month of November, and 392,300 pounds to the United States. The value of the exports of beef to the United Kingdom was $105,150, while that of exports to the United States was $34,308. Total exports of beef from Canada during the month were 2,408,400 pounds, valued at $194,445. Exports of bacon ~~and hams~~ to the United Kingdom amounted to 12,892,400 pounds, valued at $2,474,149. Total exports of bacon and hams to all countries during November was 13,026,600 pounds, valued at $2,507,123.

Interested In Eskimos

Knud Rasmussen Coming to Canada to Discuss Plans to Help Northern Tribe

Knud Rasmussen, the Danish explorer, will leave for Canada in February on the invitation of the Canadian Government, with officials of which he will discuss plans to improve the material, culture and status of the Canadian Eskimos.

Rasmussen is of the opinion the Alaskan Eskimos are living under far better conditions in all respects than Eskimos of all other countries, and he ascribes this to the educational activities of the American authorities.

Brass can be kept clean much longer if, after brightening with metal polish, it is rubbed with a rag sprinkled with paraffin.

Brooks is to have a boxing tournament on February 14th. On this occasion Cecil Young is to go six rounds with Clare Kimball of Bow Slope. These two heavy weights have met before and put up a very close argument Young winning but by a narrow margin.

* * *

Old timers of this district say that this has been one of the hardest winters on stock, in their experience. The deep snow with the alternate thawing and freezing has made it almost impossible for stock to winter out. Shortage of pasture last fall adds to the unfavorable condition on the prairie.

* * *

Last Thursday evening the pupils grades four, five and six, gave their teacher, Miss Broadfoot, a pleasant surprise party by calling at her home in a body and taking possession. As Miss Broadfoot is giving up her teaching for a time and leaving town shortly, her pupils met to express their appreciation for the interest Miss Broadfoot has always taken in them. During the evening the surprised hostess was showered with many little gifts which carried with them the sincere well wishes of the givers. After these formalities a pleasant social hour was spent.

* * *

After their regular meeting last Tuesday evening, officers and members of the local Masonic lodge entertained their friends to a social evening. There was a jolly crowd in attendance, making the evening like one large house party. Dancing was the order of the evening. As the floor was in excellent condition and the music all that could be desired the Home Sweet Home waltz came all too soon for the dancers. About midnight the gathering was greatly refreshed by a dainty lunch, supplied by and served under the direction of Mr. and Mrs. H. Champ, whose reputation in this line has long since been established. On the whole the evening was a great success.

A tax sale of town property will be held in the Town Hall on Monday morning next, February 9th, commencing at ten o'clock.

* * *

aJck Flynn, o fthe C. P. R. staff here, is spending the week in Carmichel visiting friends. As Jack is staying awy longer thn he intended the girls in town re getting curious.

Citizens of Medicine Hat appear to be taking a keen interest in the proposition submitted to the Council by A. E. Roth, to drill for oil on the city's holdings. A public meeting held last night to discuss the proposition was largely attended and from opinions heard here a large majority were in favor of supporting the proposition.

Review advertising pays. Try it.

WESTERN MANAGER

THE rapid expansion of the colonization work of the Canadian National Railways in Western Canada, and the excellent results obtained during 1924 under the direction of Mr. E. A. Field, Land Commissioner, have justified the formation of plans for the active extension of this work during 1925, and some staff changes. Formal announcement is now made that dating from January 16th, 1925, Mr. Dan M. Johnson is appointed Western Manager of this department with headquarters at Winnipeg, an appointment which will meet with very general approval throughout eastern and western Canada where Mr. Johnson is favorably known as a first class agriculturalist, stockman and business executive.

Born on the Kinealmeaky farm at Headingly, near Winnipeg, in 1884, which farm was at that time managed by his father, Mr. Johnson in his early years received a very thorough training in agriculture, both theoretical and practical. His studies were pursued at Upper Canada College, Toronto, Ont.; Wycliffe College, Gloucestershire, England; Ontario Agricultural College, Guelph, Ont., and Toronto University, from which institution of learning he graduated in 1908 with the degree of Bachelor of Scientific Agriculture. From this date until 1915 he was busy on the land as a practical farmer at Myrtle, Ontario, and North Battleford, Saskatchewan, gaining in that period invaluable experience of the farmer's problems as they are encountered in actual operation. Having by this time acquired a reputation as a stock raiser, he was in August, 1915, appointed Market Representative of the Dominion Live Stock Branch at the Union Stock Yards, St. Boniface, and in 1918 Supervisor of Stock Yards, charged with the enforcement of the Live Stock and Live Stock Products Act of 1917, and further promoted in 1920 to be Chief of Stock Yards Service for the Dominion Government.

On July 1st, 1921, Mr. Johnson resigned his position with the Dominion Government to become Agricultural Agent for the C.N.R., and was appointed General Agricultural Agent on Feb. 1st, 1924. His wide experience with agricultural, live stock, and land settlement matters, and extensive acquaintance with those directly interested in such matters, will be of considerable assistance in the performance of his new duties, which, in view of the immense importance of active colonization work to western Canada and the Canadian National Railways, affords almost unlimited scope for his activity. Among other features of the work receiving Mr. Johnson's personal direction is that of the Employment Service for farm help which the Colonization Department has organized as a matter of placing newly arrived immigrants in farm labor.

Silence That Is Not Golden

THE merchant who fails to "speak up" lets a lot golden sales slip past his store. This lost business goes either to his competitor down street or, by the mail order route, to the big city stores.

People are often surprised to find that the goods they bought "unsight unseen" from a catalogue can be seen and examined in the local store!

Tell your buying public what you have. ADVERTISING in "The REVIEW" will invite the whole community to your store. And—
